

I submitted a note of what I had hoped to present at the hearing that afternoon. I have since had sight of the Applicant's responses to comments made on the proposed video recordings of various PROWs. I am pleased to see that my comments have largely been accepted and look forward to seeing the resulting videos which are hopefully to be submitted today.

However, I remain of the opinion that such videos are not a true alternative to the ExA visiting these rights of way himself. It only by visiting in person that he will be able to comprehend the importance of these routes to users. This is not only a matter of views but also of tranquility, openness and enjoyment, as very eloquently described by [REDACTED] of the Ramblers at the hearing.
