

Deadline 5

As at 15.50 on 3rd August the Project Updates page of the East Park Energy Project was only showing updated to 31 July 2026 and did not include any of the Deadline 5 submissions.

How, therefore is it possible to comment on the Deadline 5 submissions before the closure of Deadline 6? (although under the Documents section there are submissions including 3rd August 2026)!

Again this is an example of shortened deadlines and slow updating of the website preventing both the Applicant, stakeholders and other interested parties having time to read, assess and respond to the many complex issues being examined.
