

Due to holidays and limited access to Internet, I have had limited opportunity to review the Deadline responses from the Applicant but comment as follows.

The key documents as regards public rights of way, the PROWMP, the CEMP and the CTEMP have few changes in the latest versions and do not reflect our concerns; further all three are to be finalised post-examination. There appears to be no mechanism whereby legitimate bodies such as LAFs or user groups such as BHS or Ramblers can have input to the final versions.

As regards public liason, in the latest OCEMP there are procedures for dealing with complaints and enquiries but apparently no requirements to respond to the complainant and no sharing of issues with the local liaison group.
