

#### Health and Well-being

The unprecedented size and scale of this project, along with the other 3 developments proposed, are going to have a significant impact on and loss of amenity for the population within the 30 villages that are surrounded by it.

It is disingenuous to state that there will be no effect on the well-being of the local population when relevant stakeholders within Lincolnshire who know the area and the community issues have not been brought in by this developer to do a health impact assessment.

To help the EXa make an informed decision in this area, it needs a specialist and stand-alone HIA.
