Good afternoon

At the end of the ISH3, 7000 acres asked the ExA how the outstanding question and issues surrounding Health Impacts would be examined.

Please could ask if the ExA has any updates in this matter. Is it possible to hold a hearing? We are willing to take part in a virtual only hearing if need be.

The impact of this scheme along with the other three in close proximity will have profound affects on human health and so we urge the Examining Authority to consider the various options available to them.

I look forward to your response in due course.

Kind regards

On behalf of 7000 acres
