Dear Sirs

At this point in proceedings it seems pointless to reiterate the many cogent arguments put forward by 7000 acres group and many, very well qualified and knowledgeable people.

However it seems at the issue specific hearing in January the applicants very clearly dodged having their Health and wellbeing assessment interrogated by medical professionals assembled by 7000 acres group.

I have read the applicants Health and wellbeing report and find it extremely lacking in any humanity or care. The basic premise was that 'it is likely that people will become used to the change in landscape and visual amenity and it will therefore have less of an impact on mental health and wellbeing.'

I find this view appalling and a gross abuse of our human rights. It further asserts that there would be 'minor adverse effects' that would 'not be significant'.

Who produced this vile report and what are their medical qualifications?

I can tell you that personally my mental health has already been severely affected by these absurdly stupid plans and this will only get worse, if and when, the destruction of our countryside, communities and freedoms begins.

When a so called green energy method destroys the very environment it purports to protect then we as a human race are lost. When pristine rainforest is destroyed to provide a highway to the next COP meeting in Brazil, that tells you all you need to know about the ludicrous nature of politicians running our planet.

There are extremely sinister forces at play world wide right now and it seems that Lincolnshire, the breadbasket of the country, is going to be hard hit by energy producing infrastructure. I will not give up the fight against these projects which are political vanity and commercial greed at its worst.

Your faithfully  
Sue Bingham
