Subject: Cables on Cumnor Road OX2 9NS

[You don't often get email from [REDACTED] Learn why this is important at <https://aka.ms/LearnAboutSenderIdentification>]

The application shows their intention is to have cables situated along the road on or next to our land on Cumnor Road. It is not clear where the red line wants to be. This lack of clarity which given the suffering by all adjacent appears slap dash, not fully considered.

If passed, the cable digging will encroach and damage the roots of mature trees in our field and all along Cumnor Road. Has this been considered?

It is not clear which side of the road is proposed and whether the planning application has taken into consideration the enormous water pipes which cross into our field and many other fields in this vicinity; this includes land owned by Clinton Pugh and Deborah Mackin, land owned by Carrie and Eddie Carter, Will Bartlett and Jewson Holdings.

These are owners of land that I know house Thames Water pipes because I see them (Thames Water) wandering from field to field whenever they have a problem which is often-many times each year. Has this problem been considered?

This application seeks to erase a huge area of historically, quality agricultural land that is irreplaceable but also specifically troublesome given Thames Water's network around the reservoir and Beacon Hill.
