

This deadline ends at midnight today the 1st July.

I believe that the inspector visited this area in May but we were not aware so did not interact with him. As this house is Grade 2* listed we think that it would be worth a special visit so that we can demonstrate the harm which would be caused to its environment

I have only just read the Inspector's Report of her visit to the Northern site which was on the 26th Feb. In my previous note of today's date I mistakenly put it in " May ". I see that our Grade 2* house is mentioned in passing in that note but I still believe that a further more detailed inspection is justified because of the potential harm.
