

1/ref Nov 23 impact statement pp14 5.37 Concrete shoes and pile driven rods to support the panels. Reference to this has not been made clear either then or since. Any installation using concrete introduces carbon. The reference to this does not give any indication of the quantity, placement or impact on the land.

2/ There are now so many objections and unanswered questions that the health and well-being of the communities is adversely affected.

3/ Existing compulsory pathway or bridleway signs e.g., from Heath Lane Bladon have been removed or knocked over during supposedly community beneficial gravelling in mitigation of the proposal.
