

Submission ID: [REDACTED]

I am submitting a final statement concerning the Botley West Solar Farm proposal.

The large number of questions and concerns raised about the project are well documented elsewhere so are not repeated here.

The belated and insufficient responses of the applicant to these appear disrespectful and do not indicate a serious desire to engage with the wide local population on important matters including the environment, food security, heritage, enjoyment of the land and decommissioning in due course.

If the Secretary of State truly believes proper process should be followed - this is not it.

Such a serious decision cannot be made on incomplete and deficient data.
