Dear Mr. Raywood and the Examining Team,

You are well aware of the multitude of problems associated with the Botley West Solar Farm proposal. They include missing information, factually inaccurate statements, and the developers' casual attitude to the harm they propose to inflict. The project involves three areas of land, each unsuitable for a variety of reasons. They are proposed to be clumsily strung together by miles and miles of intrusive and damaging fences and cables, to make an unwieldy and artificial whole, designed to evade local planning regulations. Criticism and concern have been expressed by more than a thousand people, many of them eminent experts in their fields.

I ask you to decide to protect the Oxfordshire countryside and all its inhabitants: the people who live here; the animals and birds to which it is home; all who work here; come as visitors; walk, run or drive through it, or fly over it; and those who cultivate and care for it, its fields and historic villages and buildings.

Please recommend that this wasteful and distressing process should go no further.

Yours sincerely,
Susan Oldfield

Subject: parliamentary questions

Dear Examiners,

I am writing in support of the written questions, tabled by our local MP, Calum Miller, concerning the funding and security issues raised by the BWSF proposal. These are questions which urgently need to be addressed.

Yours sincerely,
Susan Oldfield
