

In conclusion, based on the significant negative impacts previously detailed, I must formally reiterate my strong opposition to the planned Botley West Solar Farm. This development presents a severe and unacceptable risk by exacerbating flooding in an already vulnerable area, it stands in direct opposition to established neighbourhood plan policies, and it will inflict considerable, lasting damage on the local landscape, visual environment, and public rights of way. I therefore urge the Planning Inspectorate to reject this proposal in the interest of protecting our local community and environment.
