I am writing to continue to object to the proposed development.

It appears to me that the developers have paid lip service to this process, in much the same way that they did with the consultation. They have failed to address many of the key issues, including the use of prime agricultural land, the impact on the local landscape and the need for a development of this scale, other than for their own financial benefit.

In addition, there now appear to be questions regarding the source, availability and viability of funding for the proposed development.

On this basis I trust that the Planning Inspectorate will recommend that the Secretary of State rejects the proposal.

Yours faithfully,

David Frank Wilson
