I share the SoS's concerns about carbon emissions and his passion for alternative energy **BUT** the Botley West scheme is not focussed on reducing carbon emissions, it is focussed on making a lot of money for the applicants, PVDP. Clearly, the SoS has given PVDP an additional chance to address the many outstanding issues, because he is so keen to see this project go forward. I hope that he can now see that, despite this extra 'grace period', PVDP has failed to address the very many outstanding issues. If this project were to go ahead, it would decimate a huge swathe of Oxfordshire and do untold damage to the environment and destroy the quality of life of tens of thousands of lives here. I would urge him to reject this application. I would further urge the SoS to create more initiatives to facilitate the introduction of community solar generation initiatives.
