Subject: Proposed new submissions by PVDP

To: Secretary of State for Energy and Net Zero

That PVDP are talking openly about making major new submissions after 16 July shows their utter disregard for lawful and democratic due process. Their work should have been completed during the Examination Stage, but was so poor that they were granted an extension to 9 June. The Secretary of State has already clearly stated the fundamental necessity of working within the lawful framework and maintaining the integrity of, and confidence in, the planning process. I therefore respectfully request that submissions made by PVDP after the 6 June deadline are not accepted. PVDP have not supplied the Secretary of State with sufficient reliable information to make a fair and balanced decision within the lawful framework, and I respectfully request that the application be refused.

Yours faithfully

Elizabeth Owen
