To whom it may concern,

This sorry saga has simply been going on for too long now with the developers continuing to ignore advice and guidance on how and when to present their solar farm proposal.

Throughout they have neglected in their duty to be open and candid about the proposal, funding and supply sources and yet here we are weeks past the deadline set by the government of 9th June 2026, they continue to try new avenues of submission.

Dare we suggest they have seen how local opposition to similar proposals has been ignored and therefore

considered they really didn't need to be thorough in presenting the proposal as they were confident of success.

We urge the inspectorate to continue in their desire to guarantee fair play for both sides and ensure that the

government make no further allowance for submission on this matter.

The RVAA has been requested on numerous occasions with no attempt until now to satisfy parties that this

would be taken seriously.

May we remind all parties that those of us in opposition have always adhered to the guidelines set for us, so in

the interests of fairness and considering the considerable resources of the developers should they be given any

further extension of time.

We therefore respectfully request that SoS should not accept submissions of new material from the Applicant on

the 16th July.

Kind regards,

Craig and Melanie Carter
