Concern that the Applicant has completely ignored advice from the Secretary of State.

As a resident of the area concerned, I am very worried that the Applicant seems to think there is one rule for them that they can ignore deadlines.

The applicant had a June 9th deadline to answer many questions they had not done satisfactorily at the hearing. They were refused extra time, meaning that they could not submit any new material. They are now preparing new submissions. There again they are ignoring the advice given on 9th July 2026 and has not considered that the SOS states "that maintaining discipline within the statutory framework established by the Planning Act 2008 is of fundamental importance to the efficient and fair operation of the development consent regimes"

We the concerned have responded in time to question asked and responses sought through the examination. Given the time restrictions we would not have time to respond to the Applicants new submission.

I would respectfully request that the SOS should not accept the new submission from the Applicant on the 16 July.
