You don't often get email from [REDACTED]

The fact that the final submission for this application is by email as there is no more process to follow, says everything.

A scheme that will totally change the nature of the area it occupies and its surroundings, from countryside to industrial scale power production. It is too big and in the wrong place and will overwhelm landscape and communities.

The claim that the scheme is temporary is nonsense when no specific, funded decommissioning plan exists.

The developer has failed to provide sufficient reliable information and evidence to make an effective case for this scheme.

I strongly believe that the case to build this is not proven and therefore the Secretary of State must refuse the application.

Thank you for your consideration.

Sally Thompson
