Subject: Botley West Solar Panels - complaint from constituent whose property will be immediately affected

You don't often get email from [REDACTED]

Dear Minister of State, or to whom it may concern,

There are so many issues not yet answered in the **Botley West Solar Farm scheme:**

1. Flood Risk and Hydrology - report not considered;
2. Trainee Pilot safety - not considered that reflection could affect their training from Kidlington Airport, called in fact **the London Airport**;
3. Ecology Assessment - still not completed (Skylarks and bats particular concern);
4. The National Grid Substation - no planning consent, so no building can take place and I (**Ninon Linnell**) am particularly concerned as it will affect my property on two sides. So the situation is of paramount importance to me. **The substation/ battery could be put at the end of my garden!**
5. I have not received any visual inspection visit from an Inspector. This is unacceptable and not professional;
6. Heritage and landscape - this will spoil a small village and remains an unconsidered factor.
7. A local **Anaerobic Digestion Plant** at Worton Park, Cassington is 98% effective at creating energy from waste, whereas it would appear the solar panels will only be 6% effective. Should you wish to know more about this, Worton Park would be happy to talk to a member of your team.

My Registration Number is: [REDACTED]

A village friend is helping me to send this complaint by email, as I am in my 80s. I have lived at my home for 64 years.

Best wishes,
Ninon Linell
