Subject: Objection to Botley West Solar latest application

You don't often get email [REDACTED]

I wish to object very strongly about the Botley West Solar power station application.

I fully agree with the latest very comprehensive objections by CumnoParish Council and Stop Botley West who speak on behalf of the majority of those of us who would be affected in Oxfordshire.

The applicant has continuously not answered so many questions raised by the planning inspectorate and the answers they occasionally have supplied have been either vague, misleading or totally inaccurate. They have been allowed so many opportunities to reply over the past two years, and have missed the deadlines only to ask for extensions and then supplied only some of the required info much of which is changed from their original plans.

This is totally unacceptable. We cannot trust this developer as they do not seem to know what they are doing at all and cannot be trusted to abide by even basic planning rules.

They have been arrogant and dismissive of anyone challenging their plans or mistakes, including their apparent disregard of the very patient and thorough planning inspectorate officials who seem to understand the challenges and consequences for this vast plan far more than the developers themselves.

They are therefore very unlikely to stick to the plans they have supplied if they start building or even complete it and our local environment will be ruined forever with no recourse.

Please throw out this damaging and totally unworkable development.

Thank you for your consideration.

Yours sincerely
Valerie Mead
