Annex 5: Figures

#### INTRODUCTION

### 1.1 Project Background

- 1.1.1 Avian Ecology Ltd. was commissioned by Pegasus Planning Ltd. to undertake non-breeding bird surveys in the 2022/2023 (Year 1) and 2023/2024 (Year 2) (passage and winter) periods in relation to a proposed renewable energy generating project ('The Order Limits'); consisting of ground-mounted solar photovoltaic ('PV') arrays, together with on-site energy storage and associated infrastructure.
- 1.1.2 The Scheme is located on land to the east of the town of Thorne and to the west of the town of Crowle (the 'Order Limits'), South Yorkshire at approx. central OS grid reference: SE 72436 11486.
- 1.1.3 This report presents the detailed methodologies and findings from surveys conducted between September 2022 and March 2023, and again between September 2023 and April 2024.

The objectives of this report are to:

- Identify the presence of non-breeding bird species (waterbirds) within the Order Limits, and on adjacent land; and,
- Assess the potential importance of the non-breeding waterbird bird assemblages which the Order Limits and adjacent land supports.
- 1.1.4 The English vernacular bird names used in this report follows that of 'The British List: A Checklist of Birds of Britain (10th edition)' (British Ornithologists' Union, 2022).

#### 1.2 The Order Limits

- 1.2.1 The Order Limits (see Figure 1) encompass a series of connected agricultural land parcels, predominantly under arable management. The fields are bounded by a network of watercourses, hedgerows, fences, and tree lines. A broadleaved woodland plantation copse is present within the area, along with several ponds.
- 1.2.2 The Tween Bridge Wind Farm, comprising twenty-two operational wind turbines, is located within the Order Limits. The Stainforth and Keadby Canal also intersects the centre of the Order Limits, running from west to east.
- 1.2.3 Several internationally and nationally designated sites of ornithological importance lie within proximity to the Order Limits. Within 10 km are key international sites such as the Humber Estuary SPA and Ramsar site, and the Thorne & Hatfield Moors SPA, all of which are designated for their ornithological importance.
- 1.2.4 Nationally, the Humberhead Peatlands National Nature Reserve, located directly adjacent to the Order Limits, includes the Thorne, Crowle and Goole Moors SSSI and Hatfield Moors SSSI sites, which are known to support ornithological populations.
- 1.2.5 The Order Limits also fall within Natural England's SSSI Impact Risk Zones (IRZs) for these sites, highlighting potential sensitivities to bird populations from nearby developments.

### 1.3 Bird Species Definitions

- 1.3.1 All non-breeding waterbird species will be hereafter referred to as "notable species".
- 1.3.2 Notable species also includes species comprising non-breeding (i.e. passage and wintering) qualifying interests of the Humber Estuary SPA and Ramsar site, otherwise referred to as "main component species" in line with

Annex B Humber Estuary Special Protection Area: non-breeding waterbird assemblage (Version 1.2, June 2023) guidance. <sup>1</sup>

- 1.3.3 Main Component species are defined as:
  - All species listed individually under the assemblage feature on the SPA citation (i.e. the species that qualified in 2007 when the site was designated);
  - Species which might not be listed on the SPA citation but occur at site levels of more than 1% of the national population according to the most recent Humber Estuary Wetland Bird Survey (WeBS) 5-year average count;
  - Species where more than 2000 individuals are present according to the most recent Humber Estuary WeBS count.
- 1.3.4 Natural England advises that the main component species of the Humber Estuary SPA non-breeding waterbird assemblage include (June 2023):

Species listed individually under the assemblage feature on the SPA citation:

| •Avocet;  | •Mallard;       |
|---|-----------------|
| •Bar-tailed godwit;   | •Oystercatcher; |
| •Bittern  | ●Pochard;       |
| •Black-tailed godwit;   | •Redshank;      |
| •Brent goose;   | •Ringed plover; |
| •Curlew   | ●Ruff;          |
| ●Dunlin   | •Sanderling;    |
| •Golden plover  | •Scaup;         |
| •Golden eye   | •Shelduck;      |
| • Greenshank  | ●Teal;          |
| •Grey plover;   | •Turnstone;     |
| •Knot;  | •Whimbrel;      |
| •Lapwing;   | •Wigeon;        |
| Species not listed on the SPA citation but occurring at site levaccording to the most recent Humber Estuary Wetland Bird Su |                 |
| •Green sandpiper;   |                 |
| •Greylag goose;   |                 |

7

Little egret;

1.3.5

<sup>&</sup>lt;sup>1</sup> Natural England (2023) *Annex B: Humber Estuary Special Protection Area: non-breeding waterbird assemblage.* Version 1.2, June 2023. Available at: https://nsip-documents.planninginspectorate.gov.uk/published-documents/EN020036-000104-Natural%20England.pdf (Accessed: 16 July 2025).

- Pink-footed goose;
- Shoveler;
- Crane
- 1.3.6 Other species required for consideration but are not considered to be non-breeding waterbirds but are listed in the citation include:
  - Hen harrier;
  - Marsh harrier;
  - •Little tern;
  - Avocet; and
  - Bittern

#### Annex 1 and Schedule 1 species

1.3.7 Schedule one of the Wildlife and Countryside Act 1981 (as amended<sup>2</sup>) and Annex 1 species listed under Annex I of the EU Birds Directive (Directive 2009/147/EC<sup>3</sup>) recorded during the surveys will be referred to as such, unless included in the notable species definition above.

#### **Secondary Species**

1.3.8 All other species will be referred to as "Secondary Species". These are species that are neither Schedule one, Annex I, or notable species.

#### 2 METHODOLOGY

# 2.1 Desk study

- 2.1.1 A desk study was undertaken during 2023, to identify any existing ornithological records within a 2km radius of the Order Limits. Records were requested from the Doncaster Local Records Centre (DLRC) and Greater Lincolnshire Nature Partnership (GLNP).
- 2.1.2 For the purposes of this report, the search was refined to species listed as qualifying interest of the International sites within Humber Estuary Ramsar site and SPA, Amber List, Red List, NERC S41, Birds of Conservation Concern (BoCCs) Amber and Red List species (as per Stanbury *et al.*, 2021<sup>4</sup>), Doncaster and Lincolnshire Local Biodiversity Action Plan, Annex 1 and/or Schedule 1 species only and which may use the Order Limits for winter foraging.
- 2.1.3 Furthermore, the search was restricted to only those records for the last 10 years (2013; as part of the 2023 desk study search during the first issue of the report in 2023), to ensure the most up to date information is considered, and less relevant historic records discounted.
- 2.1.4 The results of the desk study are summarised in Section 3.1, with further details presented in Annex 1.

British Birds 114: 747.

# 2.2 Non-breeding bird surveys methods during Year 1 and Year 2

- 2.2.1 Surveys were carried out within all suitable habitats within the Order Limits, and all suitable fields within a 600m buffer (the Wider Survey Area) of the Order Limits, as shown in Figure 1. The combination of the Order Limits and Wider Survey Area will be termed 'Survey Area' hereafter.
- 2.2.2 A total of 14 walkover survey visits (two per month) were completed between September 2022 and March 2023, one diurnal and one nocturnal, with 23 walk-over surveys (three per month, two in April) completed between September 2023 and April 2024. All walk-overs used the 'look-see' methodology as described in Gilbert et al. 1998<sup>5</sup>. During each survey visit surveyors observed each field within the Survey Area, walking the boundaries and stopping at intervals and scanning the fields for bird species, with binoculars.
- 2.2.3 All bird species seen and (or) heard were recorded onto field maps. The number of Secondary Species were tallied during the survey, however these were not formally mapped.
- 2.2.4 A total of seven Nocturnal walkover survey visits were completed adopting an adapted version of the 'look-see' methodology (Gilbert *et al.* 1998<sup>8</sup>). During each survey visit surveyors observed each field within the Study Area, walking the boundaries and stopping at intervals and scanning the fields for bird species, with thermal imaging cameras and recording vocalisations of birds where possible.
- 2.2.5 Surveys were carried out using Pulsar Lexion thermal imaging cameras used to aid detection of species and where possible record the birds to species level. Where individual birds were unidentifiable due to distance or small size of the species, surveyors used knowledge of behaviour and suitable habitat for these species to make an informed estimate of a species group e.g., *Calidris* wader (sanderling or dunlin).

#### Survey Area

2.2.6 For ease of interpreting the survey results, fields within the Survey Area were numbered 1-570. Fields within the Order Limits and within the Wider Survey Area are defined in **Table 2.1 below** and illustrated on **Figures 2-7**.

Table 2.1: Field allocations for Order Limits and Wider Survey Area.

| Land Parcel                    | Field Number Range  |
|--------------------------------|---|
| The Order<br>Limits            | 1-13, 15-35, 37-43, 45-54, 60-64, 67-106, 113-120, 122, 129-130, 132-138, 141-142, 150-154, 168-176, 180, 217-218, 220-222, 226, 243-246, 248-249, 253-256, 275, 279-285, 289-292, 392, 394, 402, 407-413, 415-416, 420, 436-437, 496-500, 521, 563-564, 570-624 and 626. |
| Outside of the<br>Order Limits | 14, 36, 44, 55-59, 65-66, 107-112, 121-128, 131, 139, 140, 143-149, 155-167, 177-178, 181-216, 219, 223-242, 247, 250-252, 257-274, 276-278, 286-288, 293-406, 414, 417-435, 438-495, 501-543, 545-562, 565-569 and 625.  |

#### Survey Effort

Year 1 (2022/23)

- 2.2.7 Non-breeding bird surveys (diurnal and nocturnal) were undertaken between September 2022 and April 2023.
- 2.2.8 During year 1, Nocturnal Bird Surveys were carried out in tandem with the diurnal non-breeding Bird Surveys.

Year 2 (2023/24)

2.2.9 A second year of non-breeding bird surveys were undertaken between September 2023 and March 2024.

<sup>&</sup>lt;sup>5</sup> Gilbert G, Gibbons D.W. and Evans J. (1998) *Bird Monitoring Methods*. RSPB Sandy.

2.2.10 Nocturnal Bird Surveys were carried out separately from diurnal non-breeding Bird Surveys and were carried out monthly between September 2023 and March 2024.

#### Vantage Point Surveys

- 2.2.11 Between September 2023 and March 2024 (not carried out during the April 2024 passage period), Vantage Point (VP) flight activity surveys were undertaken from six VP locations:
  - •VP1 SE 72180 11755;
  - •VP2 SE 70377 08799;
  - •VP3 SE 72059 09720;
  - •VP4 SE 75858 10057;
  - •VP5 − SE 74195 12713; and,
  - •VP6 SE 71099 15154.
- 2.2.12 Figure 8 shows the VP locations used and their viewshed coverage which appropriately covered the Order Limits.
- 2.2.13 The VP flight activity surveys followed the NatureScot guidance (SNH, 2017<sup>6</sup>) which although is intended for wind farm developments, is considered appropriate to use for the Scheme, in the absence of guidance specific to solar farm developments. Surveys were carried out over a 3hr period and flights and activity of Important Ornithological Features were recorded onto basemaps. Any activity by Secondary Species was also recorded every 15 minutes, but detailed flights of these species were not recorded.
- 2.2.14 All VP surveys were undertaken during daylight hours, and throughout the survey period surveys were timed to cover the full range of low and high tide times which are likely to influence bird use of nearby terrestrial habitats, such as within the Survey Area.
- 2.2.15 Survey effort for VP flight activity surveys and a breakdown of survey conditions are presented in **Annex 2**. A summary of VP survey effort is presented below in **Table 2.2**.

Table 2.2: VP Flight Activity Survey Effort (hrs)

| VP | 2023      |         |          | 2024     | Total     |         |          |       |
|----|-----------|---------|----------|----------|-----------|---------|----------|-------|
| VP | September | October | November | December | September | October | November | TOTAL |
| 1  | 3         | 3       | 3        | 3        | 3         | 3       | 3        | 21    |
| 2  | 3         | 3       | 3        | 3        | 3         | 3       | 3        | 21    |
| 3  | 3         | 3       | 3        | 3        | 3         | 3       | 3        | 21    |
| 4  | 3         | 3       | 3        | 3        | 3         | 3       | 3        | 21    |
| 5  | 3         | 3       | 3        | 3        | 3         | 3       | 3        | 21    |
| 6  | 3         | 3       | 3        | 3        | 3         | 3       | 3        | 21    |

#### **Field Survey Limitations**

2.2.16 In response to scheme design, the Order Limits boundary has evolved over time. As such, a c.25ha area beyond the southern boundary of the Survey Area was not subject to survey in 2022/23. This area consists of intensively managed agricultural land which is consistent with the majority of the Study Area. This area was surveyed in 2023/24, so was surveyed throughout the Year 2 survey period. It is therefore considered, that this combined with the relatively small extent of the area is not a limitation to the survey and subsequent assessment.

<sup>&</sup>lt;sup>6</sup> Scottish Natural Heritage (2017) - *Guidance Note - Recommended Bird Survey Methods To Inform Impact Assessment of Onshore Windfarms* – available at <a href="https://www.nature.scot/doc/recommended-bird-survey-methods-inform-impact-assessment-onshore-windfarms">https://www.nature.scot/doc/recommended-bird-survey-methods-inform-impact-assessment-onshore-windfarms</a>

- 2.2.17 Access was permitted to all other parts of the Order Limits during all surveys. All fields considered suitable for notable species within the Wider Survey Area were visible from the Order Limits and/or PRoWs.
- 2.2.18 Nocturnal surveys were aided by Pulsar nightvision scopes however, it is appreciated that identification to species level is not always possible, so observers used knowledge of likely species and their behaviour to identify species as best as possible.
- 2.2.19 No significant limitations in the field survey data in informing the design and assessment of the Scheme are therefore identified.

#### **Assessing Importance**

2.2.20 For the purposes of this report, the importance of the Survey Area to qualifying species and the wider assemblage of the nearby Humber Estuary Ramsar site and SPA is assessed using functional linkage, by comparing the relevant WeBS 5 year mean to the field surveys data (monthly peak counts). This was done with the most up to date WeBS data available 2022/23 and 2023/34 and therefore were compared against that year of data that was collected (**Table 3.1** and **3.2**).<sup>7</sup>

#### 3 RESULTS

# 3.1 Desk Study Results

- 3.1.1 Over the duration of the survey programme the Draft Order Limits were revised as the project design evolved. Ornithology survey results in this appendices are presented based on the Draft Order Limits (survey area) as applicable at the time of survey, so as to fully present the extent of data collection including adjacent land which could potentially be impacted by the Scheme. It should therefore be noted that impact assessment utilises all data collected over the course of the survey programme, including the final Draft Order Limits, and is consequently robust.
- 3.1.2 **Annex 1** provides details of relevant recent historical ornithological records returned from the Devon Biodiversity Records Centre (DBRC) and Gloucestershire Local Nature Partnership (GLNP).
- 3.1.3 In summary relevant records included notable species, such as pink-footed goose, white-fronted goose, whooper swan, greylag goose, redshank and oystercatcher.
- 3.1.4 The most frequent records referred to those observations of birds within Crowle Moor and Thorne Moor within the Thorne & Hatfield Moors SPA to the immediate northeast of the Order Limits.
- 3.1.5 These records informed the identification of notable species for survey and recording and the approach to surveys, including the requirement for nocturnal surveys.
- **3.1.6** Although this data search was carried out in 2023, it remains relevant as the landscape has not changed, the species involved are highly mobile, and the data provides a good overall representation.

### 3.2 Non-Breeding Bird Surveys – Year 1 (2022/23)

3.2.1 Ten qualifying species and species part of the wider waterbird assemblage were identified during the non-breeding bird surveys, within the Order Limits. The general trend of peak bird activity during autumn and early winter (September–January), with notable declines from February onward. greylag and pink-footed geese, lapwing, and golden plover were especially abundant in the earlier months. By March and April, most species

<sup>&</sup>lt;sup>7</sup> Calbrade, N.A., Birtles, G.A., Woodward, I.D., Feather, A., Hiza, B., Caulfield, E., Balmer, D.E., Peck, K., Wotton, S.R., Shaw, J.M., and Frost, T.M. 2025.

Waterbirds in the UK 2023/24: The Wetland Bird Survey and Goose & Swan Monitoring Programme. BTO/RSPB/JNCC/NatureScot. Thetford.

had decreased significantly or disappeared altogether, indicating seasonal migration patterns or reduced local presence in late winter to early spring.

- 3.2.2 Other notable waterbird species recorded within the Order Limits include whooper swan (Annex 1) with two flocks of 23 and 34 recorded as utilising the area during February and January. Other records include grey heron (peak count 1), and little grebe (2).
- 3.2.3 Marsh harrier, a qualifying non-breeding species of the Humber Estuary SPA and Ramsar was recorded during September and December.
- 3.2.4 Schedule 1 bird species recorded within the Order Limits include barn owl (2), hen harrier (1), peregrine (1), osprey (1).
- 3.2.5 Outside of the Order Limits, seasonal patterns in bird activity, with peak counts occurring primarily in autumn and early winter were evident. Pink-footed goose (peak 700) and lapwing (peak 260) showed the highest numbers, especially in September and October, which coincides with the autumn migration period. Golden plover also peaked sharply in October (480) and did not reach numbers similar to this hereafter. Greylag goose numbers were minimal early on but rose significantly in February and March (peaks of 155 and 34), suggesting a later seasonal presence. Mallard exhibited steady presence through the winter months, peaking in January (42). Most other species appeared in low numbers or sporadically, with only isolated records, such as common crane (3) and marsh harrier (2).
- 3.2.6 Schedule one species recorded outside of the Order Limits, include barn owl (1), hen harrier (1), osprey (1), peregrine (1) and red kite (1).
- 3.2.7 All data collected can be found in **Annex 3**.

Table 3.1: SPA qualifying species recorded within and outside of the Order Limits during 2022/23. Note that nocturnal and diurnal surveys were combined and peak count of the two is provided, alongside the percentage of the moving (2022/23) WeBS 5-year moving mean totals.

# 3.3 Non-Breeding Bird Surveys – Year 2 (2023/24)

- 3.3.1 Twelve notable non-breeding bird species that are qualifying features and part of the wider bird assemblage were recorded within the Order Limits during the non-breeding bird surveys.
- 3.3.2 Non-breeding bird species recorded within the Order Limits show clear seasonal trends among the bird species recorded throughout the Survey Area. Many species recorded, including dunlin, lapwing, greylag goose, golden plover, and pink-footed goose, peak in autumn (October–November), suggesting migratory stopovers or early winter arrivals. Several waterfowl, such as mallard, wigeon, and teal, are more prominent during winter months (December–February), indicating overwintering behaviour. In early spring (March–April), species such as curlew, little egret, and oystercatcher begin to appear, likely reflecting returning migrants. Overall, there is a pattern of sharp autumn influxes followed by gradual winter declines and early spring arrivals.
- 3.3.3 Outside of the Order Limits shows that most species peak in autumn (September–November), especially pink-footed goose, greylag goose, and golden plover, indicating migratory movement. Lapwing, Mallard, and Teal maintain more consistent presence across months, with Mallard and Lapwing showing slight increases in February–March. Little egret appeared most common in early autumn, disappearing by winter. Overall, the area appears to support autumn migration activity, with fewer species and lower numbers through winter and early spring.
- 3.3.4 Only a small number of fields and months exceeded the 1% threshold of the Humber Estuary 5-year mean (2022/23) for each species within the Order Limits. These were: mallard in field 20 (92 birds in September 2022), lapwing in field 65 (260 in September 2022), green sandpiper in fields 50 and 63 (1 in October 2022) and field 129 (1 in November 2022), and pink-footed goose in field 39 (475 in October 2022), field 31 (360 in November 2022), and field 42 (330 in September 2022). All other records were below the 1% threshold.
- 3.3.5 All data collected can be found in **Annex 3**

Table 3.2. SPA qualifying species and species part of the wider waterbird assemblage recorded within and outside of the Order Limits during the Winter Walkover and Nocturnal Bird Surveys combined during 2023/24.

Note that nocturnal and diurnal surveys were combined and the maximum peak count of the two is provided alongside the percentage of the most up to date (2023/24) WeBS 5-year mean totals 8

<sup>\*</sup> Single large flock spread across four fields (1,600, 1,400, 84 and 9 birds) showing large flock of 3,133 birds

- 3.3.6 Other notable waterbirds recorded during the non-breeding bird surveys and are not considered part of the SPA wider assemblage, include gull species (black-headed, common, herring, lesser black-backed and greater black-backed), cormorant, Canada goose, Egyptian goose, gadwall, goosander, grey heron, mute swan and tufted duck.
- 3.3.7 Schedule 1 species recorded within the Order Limits also include barn owl, merlin and peregrine, where a single bird was recorded during the surveys. Marsh harrier (peak count of one individual), an SPA qualifying species were also recorded within the Order Limits foraging, as well as outside of the Order Limits.
- 3.3.8 Several species exceeded the 1% threshold of their WeBS 5-year mean within the Order Limits, indicating potential use of Functionally Linked Land (FLL). Notably, greylag goose, lapwing, mallard, and pink-footed goose regularly surpassed this threshold across multiple months, while green sandpiper exceeded it in January due to a low baseline.
- 3.3.9 Fields 17 and 18 appeared to support the following qualifying species, greylag goose, pink-footed goose, lapwing and mallard in numbers close to or exceeding the 1% threshold. Field 17 showed significant exceedances, especially in autumn, with high counts for both Greylag Goose (210 individuals in mid-September and 27 in early October) and Pink-footed Goose (1440 individuals, mid-September). Lapwing numbers (up to 100 in February) also approached the threshold here, highlighting this site's consistent value for multiple species.
- 3.3.10 Field 18 similarly demonstrated considerable importance, notably for Lapwing with high counts recorded in late September (371 individuals) and again in late November (147 individuals), exceeding the WeBS 1% thresholds. Greylag Goose was recorded at 157 individuals in late September. Mallard numbers were particularly notable, peaking at 29 in September and 125 birds in October.
- 3.3.11 Field 16 appeared to support geese during September, greylag (135) and pink-footed goose (1600).
- 3.3.12 See below for a summary of field usage and 1% threshold exceedance of SPA qualifying features and the wider assemblage.
  - Field 8: mallard in November (17 individuals);

- Field 11: lapwing (111 in September) and pink-footed goose (1530 in January).
- Field 16: Key site for geese in September—Greylag (135) and Pink-footed (1600).
- Field 17: greylag goose (210, 27) and pink-footed goose (1440).
- Field 18: lapwing (371, 147), greylag goose (157), and mallard (125, 29).
- Field 37: Green Sandpiper (1), exceeding its threshold) in October.
- Field 86: Important mallard (78) in early October.
- Field 115: Notable mallard site during winter (49, 28 individuals in Jan-Feb).
- Field 168: pink-footed goose (620) and greylag goose (38).
- Field 253: mallard (33, 37).
- Field 280: mallard (37 in March).
- Field 281: lapwing site (220).
- Field 289: Important greylag goose area (57 in September).
- Field 291 & 292: lapwing during September (129 and 257 respectively).
- Field 402: greylag goose (76 in December).

### 3.4 Vantage Point Flight Activity Survey Results

- 3.4.1 Over the six surveys undertaken from each of the six vantage points between September 2023 and March 2024, species associated with the Humber Estuary SPA and Ramsar site included golden plover, pink-footed goose lapwing and marsh harrier. Additional IOFs comprised common crane.
- 3.4.2 Flocks that exceeded 100 birds included pink-footed goose (eight flocks of between 107 and 220 birds between September 2023 and November 2023) and lapwing (six flocks of between 130 and 310 birds in October 2023, January 2024 and February 2024). Observations generally involved flocks flying over the Order Limits, with the exception of two flocks of lapwing (127 birds in October 2023 and 156 birds in January 2024) seen to land and/or be present feeding on the ground throughout the survey, which is located outside of the Order Limits.
- 3.4.3 Birds recorded during the vantage point flight activity surveys both on the ground and in flight are summarised in **Table 3.3**. Full survey effort is shown in **Annex 2** with the details of each flight observation shown in **Annex 4**.

Table 3.3: Vantage point flight activity survey results during 2023/24

| Vantage<br>Point | Species           | No. Observations | No. Birds | On Ground? | Fields   |
|------------------|-------------------|------------------|-----------|------------|--|
|                  | Pink-footed goose | 4                | 223       | No         | Flew over the Order Limits and study area in flocks of up to 148 birds |
| 1                | Golden plover     | 1                | 23        | No         | Flew over the Order Limits   |
|                  | Marsh harrier     | 5                | 5         | No         | Hunting over fields  |
|                  | Pink-footed goose | 5                | 143       | No         | Flew over the Order Limits in flocks of up to 47 birds                 |

Species associated with the Humber Estuary SPA recorded in **bold** 

Those in brackets were recorded in flight only.

<sup>&#</sup>x27;-' means that the species was not recorded during that visit.

Table A3.2: Bird species Recorded within the Wider Survey Area 2022/23. Note that this includes diurnal and nocturnal walk-over surveys

Species associated with the Humber Estuary SPA recorded in **bold** 

Those in brackets were recorded in flight only.

<sup>&#</sup>x27;-' means that the species was not recorded during that visit.

Table A3.3: Bird species Recorded within the Order Limits 2023/24. Winter walk-over (WWO) refers to diurnal surveys and "NOC" denotes nocturnal walk-over surveys. Numbers in brackets denote flying over.
