Appendix 17.2 Cumulative Sites Short List

17. Introduction

17.1. Overview

- 17.1.1. **ES Appendix 17.1 [Document Reference 6.3.17.1]** sets out the long list of cumulative schemes identified as being relevant to the Scheme. Each of these identified schemes were then reviewed as part of Stages 1 and 2 of the four stage approach as set out in **Section 17.3** of **ES Chapter 17 Cumulative Impacts** [**Document Reference 6.2.17**] and summaised below:
 - Stage 1 Establish the Scheme's Zone of Influence (ZOI) and identify a long list of 'other developments'.
 - Stage 2 Identify the short list of 'other developments' for Cumulative Effects Assessment
 - Stage 3 Information Gathering of 'other developments'
 - Stage 4 An assessment of the likely cumulative effects. An assessment of the likely cumulative effects. Mitigation measures are identified (where appropriate) where an adverse cumulative effect is identified.
- 17.1.2. Those cumulative scheme identified to be progressed to the shortlist and reviewed against cumulative effects stages 3 and 4 are then progressed as part of the Cumulative Assessment presented in ES Chapter 17 Cumulative Impacts [Document Reference 6.2.17]. The short list of all potential cumulative developments in presented in Table 17–1 of this documents. This information was collated prior to the finalization of the ES, and as required, was frozen on the 14 of May 2025.
- 17.1.3. Since the submission of the Preliminary Environmental Information Report (PEIR) the short list has been reviewed and updated.
