Dear Sarah Norris,

**Application by RWE Renewables Solar and Storage Ltd for Tween Bridge Solar Farm (Application Reference: EN010148)**

I write to you following the letter received by the Examining Authority on the 15<sup>th</sup> January which stated that the Planning Inspectorate (PINS) cannot accept the request for a delay in the examination and extension in the pre-examination period.

The Applicant can confirm that it will continue with the DCO Application and the Preliminary Meeting on the 10<sup>th</sup> March 2026. Since the Applicant's request to pause and the Planning Inspectorate's response, the Applicant has been able to secure the necessary internal approvals and funding to proceed without full clarity over the exact grid connection date.

Yours sincerely,

Senior Project Manager  
RWE Renewables Solar and Storage
