

PROPERTY #44

in response to q14.0.2 fire safety , solar panels on all 4 sides (sorry i am unable to direct you to a plan , as the layout plan appears to disappeared from the website) In the event of a major fire we have no safe route for escape , therefore would the applicant remove 2 sections of panels namely adjacent to plains house on the west side of the anchor drain & to the south of plains lane , this would at the very least allow safe escape on foot to the south towards the m180 motorway , the later would also benefit the poultry unit to the east with its wooden construction buildings
i am happy to interact with RWE
