Our Ref: EN010148

Date: 03 June 2026

Dear Sir/Madam,

The Infrastructure Planning (Examination Procedure) Rules 2010 – rule 17

Application by RWE Renewables UK Solar and Storage Limited for an order granting development consent for the Tween Bridge Solar Farm Project

Request for further information

I am writing under rule 17 of the Infrastructure Planning (Examination Procedure) Rules 2010.

Thank you for your relevant representation [Examination library reference RR-023] dated 23 December 2025. This included a RAG rated table (Table 1) and other representations in relation to the Tween Bridge Solar Farm Project. There were a significant number of amber rated issues flagged.

Since then, I have also received Natural England's responses to my first written questions (EXQ1) [REP2-105] and a copy of a draft statement of common ground [REP1-057]. Whilst these documents are useful, they do not include an updated version of the tables submitted in December 2025. As such, it is difficult for me and the Environmental Services Team to understand how issues are progressing.

As such, please could you ensure that you submit an updated version of the tables submitted at deadline 1A [RR-023] by deadline 3, which is 30 June 2026.

This is particularly important given that I need to publish the Report on Implications for European Sites on 11 August 2026. I need sufficient time to properly consider any issues raised by Natural England.

Yours sincerely,

Luke Simpson
