

1 I feel that my house will be de-valued

2 That there's a high risk to the aquifer

3 That wildlife will be badly affected

4 The proposed solar panels will be far to close to my property also I am very concerned that as my neighbour has a registered airstrip which is regularly used that in the advent hopefully not that there was a accident that the emergency services would have problems in gaining access. This could possibly be caused by glint and glare.  
So based on this comment I feel if this goes in the present format it should be pushed back from our properties for safety reasons

5 Also the loss of prime agricultural land, we have a increase in population for one reason or another so to remove this amount of land should not be allowed
