Please can you insert this in the comments for deadline 2. I don't have access to the internet today.

Comment from Springwell Solar Action Group

There is growing concern around the validity of the assessment of the soil. The assessments have been made by RSK who are without question acting on behalf of Springwell Solar.

We would like to request that a 3rd party is given access to the land to provide the Inspector with a truly independent assessment. We note assessments of land in Navenby BESS application stating 3b where local farmers and literature state grade 2. It is not acceptable that the applicant is able to mark their own work with no oversight.

Kind regards
