Subject: Submission - Springwell Solar Factory

Categories: Deadline

Hello - I am submitting this objection on behalf of Mr & Mrs Brackenbury. Can you please confirm receipt.

We object to Springwell development of solar panels because it would be using good quality farmland that has been farmed for generations. We think food security is far more important than an unreliable power source. The solar panels to be used are already outdated and will presumably come from China , one of the biggest polluters in the world.

Regards,

C Kerrigan
