# 1. Introduction

## 1.1. Purpose of this Document

- 1.1.1 This document provides a guide to Springwell Energyfarm Limited (the 'Applicant') application for a Development Consent Order (DCO) for Springwell Solar Farm made to the Secretary of State for Energy Security and Net Zero (the 'Secretary of State') pursuant to the Planning Act 2008 (PA 2008).
- 1.1.2 The Proposed Development is a new solar farm with battery storage at land north of Sleaford, close to the settlements of Blankney, Scopwick, Kirkby Green and Ashby de la Launde (the "Site"), within the administrative boundaries of North Kesteven District Council ("NKDC") and Lincolnshire County Council ("LCC") (the "host authorities").
- 1.1.3 The Proposed Development has a grid connection agreement with National Grid allowing the export and import of 800 MW of electricity through a proposed new substation, owned and operated by National Grid ("National Grid Navenby Substation").
- 1.1.4 The Proposed Development meets the criteria to be considered as a Nationally Significant Infrastructure Project ("NSIP") under section 15(2) of the PA 2008 as it is a proposed generating station which would be within England, does not generate electricity from wind, would not be offshore and would have a total generating capacity of more than 50 MW.
- 1.1.5 A full description of the Proposed Development is provided in **ES Volume 1, Chapter 3: Proposed Development Description [EN010149/APP/6.1.2]** [\[REP1-022\]](#).
- 1.1.6 This Guide aims to help the Examining Authority (ExA) and interested parties understand the DCO Application through signposting to the documents that make up the Application.
- 1.1.7 The Infrastructure Planning (Applications: Prescribed Forms and Procedure) Regulations 2009 (as amended) (APFP Regulations) were updated in April 2024, but it should be noted that at this stage the pre-application process of the Proposed Development was underway. Therefore, the updated APFP Regulations have been complied with where possible.
- 1.1.8 Regulation 5 of the APFP Regulations sets out the documents that all DCO applications must include. The APFP Regulations also provide at Regulation 5(2)(q) for the submission of "any other documents considered necessary to support the application" as well as at Regulation 5(2)(o) for "any other plans, drawings and sections necessary to describe the proposals".
- 1.1.9 Regulation 6 of the APFP Regulations sets out the specific documentation required in support of draft DCO applications for particular types of development, including generating stations and grid connections.
- 1.1.10 The Proposed Development constitutes an Environmental Impact Assessment (EIA) development, and therefore the Infrastructure Planning (Environmental Impact Assessment) Regulations 2017 (the EIA Regulations) and requirements contained therein apply.

## 1.2 The Applicant

- 1.2.1 The Applicant is Springwell Energyfarm Limited, a joint venture between EDF Renewables UK and Luminous Energy.
- 1.2.2 EDF Renewables UK, a subsidiary of EDF's Group, is one of the world's largest low-carbon electricity companies. EDF Renewables UK has an operating portfolio of 38 renewable energy sites, including solar, battery, onshore and offshore wind and is providing much-needed affordable and low-carbon electricity. EDF's Renewables UK investment and innovation are reducing costs for customers and bringing significant benefits to communities. EDF Renewables UK invests in projects and the communities where they operate for the long term. EDF Renewables UK remains involved in projects over its lifetime, from development, construction, and operation all the way through to decommissioning.
- 1.2.3 Luminous Energy, founded in 2013, is an established UK-based renewable energy developer with projects in the UK, US, Chile, and Australia. Luminous Energy is now regarded as a leading player in the market, having delivered 1GW of projects globally, and the company's core values of providing people around the world with affordable, renewable energy remain firmly at the heart of the business.

## 1.3 Structure of this document

| Part 7 – Additional prescribed information for specific types of projects | Contains additional documents pertaining to the Proposed Development, required by Regulation 6 of the APFP Regulations and considered by the Applicant to be required to support the application in accordance with Regulation 5(2)(q) of the APFP Regulations.        |
| Part 8 – Examination Documents  | Contains documents submitted during examination.   |

- 2.1.2 In addition, Appendix 1 of this Guide provides a document schedule, which is a live document that will be updated during subsequent stages of the application should additional documents be required or updates be made to documents. The table identifies the Application Document Number, the PINS Reference, the Infrastructure Planning (Applications: Prescribed Forms and Procedure [APFP]) Regulations 2009,

Document Title, whether it is a grouped document, Submission Date, Version Number and the Post-DCO Submission Date (if any) of the document.

- 2.1.2 A copy of all the application submission documents will be available on the PINS website following acceptance from the Secretary of State.

## 2.2 Document Numbering

- 2.2.1 Documents are numbered in sequence within the respective parts (as outlined in Appendix A of this Guide), with the part number being the first digit of a document number. This is followed, where relevant, by the document number, the chapter and/or Appendix number.
