

Melbourne Holdings (Melbourne Property) Ltd is the freehold owner of land affected by the proposed Beacon Fen Energy Park cable route. We object to the proposal insofar as it affects our land. We do not consent to the use or acquisition of our land and wish to continue farming it as part of an active agricultural enterprise.

We have concerns regarding the permanent loss and fragmentation of productive agricultural land, impacts on soil structure, drainage and irrigation infrastructure, and the wider effect on the operation and viability of the farm.

This comment is submitted to ensure our position as an objecting landowner is clearly recorded. We reserve the right to submit further and more detailed written representations later in the Examination.
