Hi

The case is still being investigated, thank you for further providing information, I hope to complete it before the end of the month but that does depend upon what other cases come in. If you could provide any further detail on previous approximate annual fertiliser and herbicide treatments that might be helpful in confirmation that it was improved grassland. Also do you know which parcel the curlew have previously attempted to breed on please ?

I will advise as soon as I have determined your case.

Kind regards
