

I am opposed to Fosse Green Energy's plans for Solar panels because they will ruin vast areas of our beautiful countryside for no other reason than to make a lot of money which wont even stay in the uk, (they are not building these vile sites because they like us)

I have nothing against solar panels, they should be on roofs of which the uk has about 500000 acres. The solar farm will destroy wildlife habitat and destroy vital food growing land. Our countryside is being vandalised for nothing apart from to satisfy a few idiotic politican's egos.
