

Submission ID: S0437C329

This Fosse Green project , if it allowed to go ahead , has the potential to totally ruin the Cliff Village community around Navenby.

This area ,on the ridge, is unique amongst Lincolnshire's flat and sometimes boring landscape and should be left unspoilt for future generations.

The project would be a real hazard to the close villages due battery fire risk , the associated pylons and wires a visual eyesore and the increased traffic a big strain on the local overcrowded roads .

Please stop this project .
