2	Purpose of the Order	2
3	Parameters of the Order and "consent envelope"	5
4	Draft Order	8
5	Schedules	4846

1 Summary

1.1.1 This memorandum explains the purpose and effect of each article of, and the Schedules to, the Peartree Hill Solar Farm Draft Development Consent Order 202[] (the Order) [EN010157/APP/3.1 Revision 4] (the Order), as required by Regulation 5(2)(c) of the Infrastructure Planning (Applications: Prescribed Forms and Procedure) Regulations 2009¹. Regulation 5(2)(c) requires an explanatory memorandum to explain "the purpose and effect of provisions in the draft Order".

2 Purpose of the Order

2.1 Background

2.1.1 RWE Renewables UK Solar and Storage Limited (the Applicant) is applying to the Secretary of State for Energy Security and Net Zero (the Secretary of State) for a development consent order authorising the construction, operation, maintenance and decommissioning of a solar photovoltaic array electricity generating facility, battery energy storage system and associated infrastructure which would allow for the generation and export of electricity (the Proposed Development).

2.2 Nationally Significant Infrastructure Project and associated development

- 2.2.1 The Proposed Development is a nationally significant infrastructure project (NSIP) within sections 14(1)(a) and 15 of the Planning Act 2008 (the 2008 Act). This is because the Proposed Development consists of a generating station with a gross electrical output capacity exceeding 50MW. The Applicant, therefore, requires development consent under the 2008 Act in order to construct and operate the Proposed Development. Development consent may only be granted by order, following an application to the Secretary of State (section 37 of the 2008 Act).
- 2.2.2 Schedule 1 to the Order contains a list of numbered works comprising the Proposed Development. The description of the Proposed Development does not refer to an upper limit on the capacity of the generating station that development consent is being sought for. It is not considered that imposing an upper limit is

¹ S.I. 2009/2264

desirable or necessary. The Order includes reference to the means by which the parameters of the Proposed Development will be constrained and it is on this basis that the Environmental Impact Assessment has been undertaken, as set out in the **Environmental Statement [EN010157/APP/6.1]** and explained further in relation to the 'consent envelope' in section 3 of this Explanatory Memorandum. The Applicant is confident that those parameters are adequately secured in the Order.

- 2.2.3 An upper limit on capacity has not been included so that there is adequate flexibility for the Applicant. For example, the Applicant may take advantage of technological improvements and innovation that may emerge before construction, which would enable it to still construct the Proposed Development within the assessed parameters but increase capacity beyond that which is currently anticipated. It is in the public interest and accords with national policy to facilitate efficient and maximum generation from renewable sources, which is explained further in the Statement of Need appended to the **Planning Statement** [EN010157/APP/5.5]. The approach taken has precedent in the Cottam Solar Project Order 2024, the Gate Burton Energy Park Order 2024, The Mallard Pass Solar Farm Order 2024, Cleve Hill Solar Park Order 2020, the Little Crow Solar Park Order 2022 and the Longfield Solar Farm Order 2023. It is also reflected in NPS EN-3² guidance: "AC installed export capacity should not be seen as an appropriate tool to constrain the impacts of a solar farm. Applicants should use other measurements, such as panel size, total area and percentage of ground cover to set the maximum extent of development when determining the planning impacts of an application."
- 2.2.4 As well as the NSIP itself, the Proposed Development also includes associated development, as defined in section 115(2) of the 2008 Act.
- 2.2.5 Recent guidance sets out that "associated development and works proposed to be included in a DCO must be demonstrably linked and subordinate to the NSIP, and required to ensure it can be built or operated. It is not acceptable to propose associated development in a DCO which is self-contained or effectively a separate NSIP development in its own right." This guidance cross refers previous guidance which considers associated development in more detail.
- 2.2.6 This guidance⁴ on associated development has been issued by the Secretary of State for Communities and Local Government. In this guidance associated

² Department for Energy Security & Net Zero (2023). National Policy Statement for Renewable Energy Infrastructure (EN-3).

³ Department for Levelling Up, Housing and Communities (2024). Planning Act 2008: Content of a Development Consent Order required for Nationally Significant Infrastructure Projects

⁴ Department for Communities and Local Government (2013). Planning Act 2008: Guidance on associated development applications for major infrastructure projects.

development is described as being "typical of development brought forward alongside the relevant type of principal development or of a kind that is usually necessary to support a particular type of project, for example (where consistent with the core principles above) a grid connection for a commercial power station" (paragraph 6) and "requires a direct relationship between associated development and the principal development. Associated development should therefore either support the construction or operation of the principal development, or help address its impacts. Associated development should not be an aim in itself but should be subordinate to the principal development" (paragraph 5).

- 2.2.7 In line with the above guidance, Works Nos. 2 to 9 are required to support the construction or operation of Work No. 1, or help address its impacts and are therefore 'associated development' to the NSIP within the meaning of section 115(2) of the 2008 Act and so can properly be authorised by the Order.
- 2.2.8 In order to ensure that the numbered works comprising the authorised development in Schedule 1 may be constructed efficiently and without impediment, the Order includes other works or operations (referred to in the Order as 'further associated development' and listed (a) to (s) in Schedule 1). Each item listed under 'further associated development' is required in connection with a 'numbered work'. This is a widely precedented approach and has been approved by the Secretary of State in other made DCOs, such as The Heckington Fen Solar Park Order 2025, The Gate Burton Energy Park Order 2024, The Mallard Pass Solar Farm Order 2024 and The Cottam Solar Project Order 2024.
- 2.2.9 The Applicant has ensured that this 'further associated development' can only be carried out where they do not give rise to materially new or materially different environmental effects as compared with the environmental statement by including a proviso in the provision. In any event, the Order requires that the Proposed Development is designed in accordance with the approved details and those details must accord with the design parameters document (see Requirement 3 below); the rights and restrictive covenants which can be acquired are limited for the plots and purposes in Schedule 8; and temporary possession powers are limited to the purposes specified in Schedule 10 for plots listed therein. These controls, amongst others, therefore, impose further limitation on the use of the further associated development powers.

2.3 Ancillary matters

2.3.1 The Order also contains several ancillary matters, i.e. provisions not consisting of development.

- 2.3.2 An important ancillary matter is a power to acquire land or rights over land compulsorily or by agreement, in accordance with section 120(3) of the 2008 Act, required for the authorised development, or to facilitate, or that are incidental to the authorised development under section 122 of the Act. A justification for these powers is set out in the **Statement of Reasons [EN010157/APP/4.1]** that accompanies the application.
- 2.3.3 Further to providing these powers, the Order seeks to apply and modify statutory provisions that relate to the compulsory acquisition of land. Under sections 117 and 120(5) of the 2008 Act, an order containing provisions of this nature must be made by Statutory Instrument. The Order is therefore presented in that form.
- 2.3.4 Other ancillary matters include the temporary closing of streets, traffic regulation measures, the use of private roads and the application and disapplication of legislation relating to the Proposed Development.

3 Parameters of the Order and "consent envelope"

- 3.1.1 The detailed design of the Proposed Development must be in accordance with the **Design Parameters Document [EN010157/APP/5.8]**, as secured in Requirement 3 of Schedule 2 of the Order. This approach is taken to ensure suitable flexibility in the design of the Proposed Development, for example new technology can be used within that envelope, while ensuring that the development will not fall outside of the scope of the **Environmental Statement [EN010157/APP/6.1]**. The principle of using a design envelope is recognised as appropriate for a wide range of NSIPs and is described in the Planning Inspectorate's Advice Note 'Content of a Development Consent Order', specifically Paragraph 008).
- 3.1.2 In addition to the **Design Parameters Document [EN010157/APP/5.8]**, other DCO requirements, certified documents and plans will operate to control and manage the detailed design of the Proposed Development, as well as its construction, operation (including maintenance) and decommissioning. The way in which those mechanisms work together as an envelope within which the authorised development is to be undertaken, is explained in more detail below.
- 3.1.3 Article 3 (Development consent etc. granted by this Order) and Schedule 2 (Requirements) operate to create a "consent envelope" within which the Proposed Development would be brought forward. The Proposed Development is described in Schedule 1 of the Order, where it is referred to as the "authorised"

- development". The authorised development is granted consent pursuant to article 3(1).
- 3.1.4 In Schedule 1 (the authorised development) the Proposed Development is divided into a series of component parts, referred to as "numbered works".
- 3.1.5 The limits within which the authorised development may be carried out Article 7 (Limits of deviation) requires that the numbered works authorised by the Order are situated in the areas shown on the Works Plans [EN010157/APP/2.2 Revision 2].
- 3.1.6 The design of the Proposed Development is controlled via Requirement 3 (detailed design approval) of Schedule 2 of the Order which requires approval of details of the Proposed Development's design and requires that the details submitted accord with the Design Parameters document [EN010157/APP/5.8]. The Design Parameters Document [EN010157/APP/5.8] secures the parameters that are necessary to ensure that the Proposed Development is constructed, operated and decommissioned in such a way that the impacts and effects would not exceed the scenario assessed in the Environmental Statement [EN010157/APP/6.1].
- 3.1.7 In addition to the **Design Parameters Document [EN010157/APP/5.8]** and **Works Plans [EN010157/APP/2.2]**, the design of the Proposed Development is also controlled by:
 - 3.1.7.1. approval and implementation of the landscape and ecological management plan (Requirement 9);
 - 3.1.7.2. approval and implementation of the rights of way and access management plan (Requirement 10).
 - 3.1.7.3. approval and implementation of <u>temporary permanent</u> fencing and other means of enclosure (Requirement 11); and
 - 3.1.7.4. implementation of the written scheme of investigation for archaeological mitigation (Requirement 13).
- 3.1.8 Where the **Design Parameters Document [EN010157/APP/5.8]** does not include guidance or controls for an aspect of a numbered work, this is justified on the basis of the environmental impact assessment and having regard to the other controls in place via the measures listed above.
- 3.1.9 The construction phase of the Proposed Development is also controlled by:

- 3.1.9.1. approval and implementation of the construction environmental management plan (Requirement 4);
- 3.1.9.2. approval and implementation of the construction traffic management plan (Requirement 5);
- 3.1.9.3. approval and implementation of a soil management plan (Requirement 6);
- 3.1.9.4. approval and implementation of a site waste management plan (Requirement 7);
- 3.1.9.5. approval and implementation of temporary fencing and other means of enclosure (Requirement 11); and
- 3.1.9.6. implementation of the written scheme of investigation for archaeological mitigation (Requirement 13).
- 3.1.10 The ongoing operation and maintenance of the Proposed Development is controlled by:
 - 3.1.10.1. approval and implementation of a soil management plan (Requirement 6);
 - 3.1.10.2. approval and implementation of a site waste management plan (Requirement 7);
 - 3.1.10.3. approval and implementation of a battery safety management plan (Requirement 8);
 - 3.1.10.4. approval and implementation of the landscape and ecological management plan (Requirement 9);
 - 3.1.10.5. approval and implementation of <u>temporary permanent</u> fencing and other means of enclosure (Requirement 11);
 - 3.1.10.6. approval and implementation of an operational noise assessment (Requirement 12); and
 - 3.1.10.7. approval and implementation of the operational environmental management plan (Requirement 14).

- 3.1.11 The decommissioning of the Proposed Development is controlled by the approval and implementation of a decommissioning environmental management plan (Requirement 15).
- 3.1.12 The Application seeks flexibility to undertake the Proposed Development within the above envelope, in particular within the maximum areas and parameters secured via the Works Plans [EN010157/APP/2.2] and Design Parameters Document [EN010157/APP/5.8]. As set out in Chapter 5: Approach to EIA of the Environmental Statement [EN010157/APP/6.1] and the individual technical chapters, the environmental impact assessment has assessed a worst case and has considered and confirmed that any scheme built within the maximum areas and parameters would have effects no worse than those assessed.
- 3.1.13 Any indicative development layouts that have been submitted to provide illustrative examples of the different design layouts have been considered for the Proposed Development that could be built out within the "consent envelope" (the design aspect of which is controlled primarily through the Works Plans [EN010157/APP/2.2] and Design Parameters Document [EN010157/APP/5.8]. These are provided for illustration only within the Environmental Statement figures [EN010157/APP/6.3] and are not sought to be secured.

4 Draft Order

- 4.1.1 The purpose and effect of the provisions of the draft Order are now explained in sequence. While the Infrastructure Planning (Model Provisions) (England and Wales) Order 2009⁵ (the Model Provisions) has formally lapsed, the draft Order draws on the Model Provisions, as well as precedent set by DCOs that have been made to date.
- 4.1.2 Several made DCOs contain articles which incorporate a provision by which the Applicant must obtain consent, agreement or approval from a third party before it may do something and that such consent, agreement or approval shall not be unreasonably withheld, as well as a longstop default provision to the effect that, if the relevant third party fails to respond, the consent, agreement or approval shall be deemed to have been given.
- 4.1.3 The Applicant considers this approach to be necessary to remove the possibility for undue delay and to provide certainty that the authorised development can be delivered in a timely fashion. This approach is also considered to be proportionate in that, having undertaken extensive pre-application consultation and the Order

⁵ S.I. 2009/2265

having been rigorously examined, the delivery of the authorised development should not be held up unreasonably, if it has been approved by the Secretary of State.

4.1.4 The draft Order includes, therefore, at articles 11 (street works), 134 (Power to alter layout, etc., of streets), 156 (Temporary closure or restriction of streets and public rights of way), 167 (Access to works), 189 (Traffic regulation measures), 1920 (Discharge of water) and 212 (Authority to survey and investigate the land) a deemed consenting regime to apply whereby if a consent etc, is required and no such consent etc is provided within 28 days of receiving an application for consent or approval, the consenting authority is deemed to have granted consent.

Part 1 - Preliminary

4.2 Article 1 - Citation and commencement

4.2.1 Article 1 sets out the name of the Order, establishing how it may be cited in subsequent legislation. It also gives the date on which the Order comes into force. This article did not appear in the Model Provisions. However, it is a standard article that is included in all DCOs.

4.3 Article 2 - Interpretation

- 4.3.1 The purpose of article 2(1) is to define terms used in the remainder of the Order.
- 4.3.2 Article 2 makes alterations to the Model Provisions to accommodate the departures from the Model Provisions elsewhere in the Order, and to add required definitions that are relevant in the context of the authorised development.
- 4.3.3 Definitions of particular note include:
 - 4.3.3.1. The definition of "authorised development" makes reference to "and any other development authorised by the Order". The inclusion of "any other development" is because the Order provides for powers to carry out limited activities beyond the Order limits. These limited activities are included for the benefit of third parties, rather than the Applicant. articles 204 (protective works to buildings) and 212 (authority to survey and investigate land) are powers that impact land within the Order limits as well as those affected by the authorised development. This wording allows the Applicant to retain flexibility to provide protective works to buildings if necessary. In relation to surveys and investigations, there is scope for movement across the Order Limits. The Applicant considers it

important to extend this power to surrounding areas which could be impacted by the authorised development and would need to be included for surveys and investigations.

- 4.3.3.2. The definition of "commence" is defined so as to exclude "permitted preliminary works". This exclusion is required to enable the undertaker to carry out certain preparatory works prior to the submission of relevant details for approval under the requirements contained in Schedule 2 to the Order so that certain works can be carried out without "commencing" the authorised development, in order to build the required flexibility into how the authorised development can be constructed. The works identified in the "permitted preliminary works" definition include pre-commencement activities such as surveys, monitoring and site investigations which are considered appropriate as the nature of these works means they are not expected to give rise to environmental effects requiring mitigation. However, the Applicant does recognise that prior to some of the works identified as "permitted preliminary works", there may be a requirement to submit details to the Local Planning Authority. Where this is the case, the requirement expressly prevents certain "permitted preliminary works" from being carried out until those details have been approved, for example Requirement 13 (Archaeology).
- 4.3.3.3. The definition of "commence" is tailored to the requirements of the authorised development, but these provisions are widely precedented (see for example The Gate Burton Energy Park Order 2024, The Mallard Pass Solar Farm Order 2024 and The Cottam Solar Project Order 2024).
- 4.3.3.4. A definition of "maintain" has been added to make clear what activities are authorised under article 5 during the operation of the authorised development; the definition does not permit the whole of the Proposed Development to be removed, replaced or reconstructed. The definition has been drafted to directly reflect the nature and context of the authorised development, which will need to be properly maintained, managed and protected throughout its operational lifetime. The drafting, therefore, reflects this operational period and the likely framework of maintenance that will be required while enabling technological and practice advancement and improvements within identified environmental performance standards. Therefore, some flexibility must be built-in to what maintenance of the authorised development will involve, particularly to keep up with changing standards and controls and advances in technology. The approach taken has precedent in the Longfield Solar Farm Order 2023, The Gate Burton Energy Park Order 2024, The Mallard Pass Solar Farm Order 2024 and The Cottam Solar Project Order 2024.

- 4.3.3.5. For the purposes of the authorised development, examples of the activities anticipated to be covered are listed below:
 - Maintenance and inspection: Throughout the life of the authorised development there will be a planned maintenance regime and, on occasion, the need for unplanned maintenance due to plant failures. It is anticipated that staff will attend when required for maintenance and cleaning activities;
 - b) Repair / Refurbish / Replace: Through the planned maintenance regime and indeed through any unplanned maintenance required due to plant failures, it is likely that some plant and equipment, particularly those with moving parts, will need to be repaired or refurbished or indeed replaced;
 - Adjust and alter: Through the planned maintenance regime, and indeed outside the planned maintenance regime, there may be a need to adjust or alter elements comprising the authorised development to respond to changing conditions;
 - d) Remove: Adjustment and replacement activities will require plant, equipment and material to be removed;
 - Reconstruct: If, for example, a part has to be dismantled in order to be repaired or refurbished, then that part will need to be reconstructed;
 - f) Improve: Technology will improve over the life of the authorised development and therefore there may be opportunities to "improve" the workings of the plant and equipment by, for example, the removal of an old part and replacing it with a new, more efficient part;
- 4.3.3.6. "Order land" is defined as the land shown on the land plans which is within the limits of land to be acquired or used and described in the book of reference.
- 4.3.3.7. "Order limits" references the limits as shown on the lands plans and works plans within which the authorised development may be carried out and land acquired or used.
- 4.3.4 Article 2(2) provides that a broad definition of "rights over land" applies to the Order.
- 4.3.5 Article 2(3) provides that measurements are approximate. The purpose of this is to ensure that if, upon construction of the works, it transpires that the distances

are marginally different to those listed in the Order, there is no issue over whether the works are permitted by the Order. Thus, this provision allows for a small tolerance with respect to any distances and points, although works will take place within the limits of deviation. It is commonplace to include such provision in an Act or instrument authorising nationally significant infrastructure (see, for example, article 2(3) of The Gate Burton Energy Park Order 2024, article 2(4) of The Mallard Pass Solar Farm Order 2024 and article 2(3) of The Cottam Solar Project Order 2024).

- 4.3.6 Article 2(4) provides that areas given in the book of reference are approximate as these are not covered by article 2(3). This is intended to clarify the status of the area measurements in the book of reference, and the purpose and effect of the term "approximately" in this context is the same as set out in paragraph 4.3.5. The term "approximately" is required to be read into all plot area measurements in the book of reference, as these measurements are given in square metres, and each measurement is rounded up to the nearest whole square metre. This is widely precedented, for example article 2(7) of The Gate Burton Energy Park Order 2024, article 2(8) of The Mallard Pass Solar Farm Order 2024 and article 2(7) of the Cottam Solar Project Order 2024.
- 4.3.7 Articles 2(5) and 2(6) tie references to lettered/numbered points and numbered works in the Order to the relevant plans referenced and Schedule 1 of the Order, respectively.
- 4.3.8 Article 2(7) clarifies that references to "Schedule", are unless otherwise stated, references to the Schedules of the Order.
- 4.3.9 Article 2(8) confirms that the expression "includes", when used in the Order, is to be construed without limitation.
- 4.3.10 Article 2(9) clarifies that references to any statutory body includes that body's successors from time to time.
- 4.3.11 Article 2(10) clarifies that references to "part of the authorised development" are to be construed as references to stages, phases or elements of the authorised development.
- 4.3.12 Article 2(11) clarifies that any references to materially new or materially different environmental effects in comparison with those reported in the **Environmental Statement [EN010157/APP/6.1]** must not be construed so as to include the avoidance, removal or reduction of an adverse environmental effect that was reported in the Environmental Statement as a result of the authorised development. There are a number of provisions in the Order where activities are

constrained to those which do not give rise to materially new or materially different environmental effects or where variations are permissible provided they do not give rise to such effects (e.g. the definition of maintain, article 5). The explanation and justification for the ability to make these variations is set out in the commentary on the relevant provision.

- 4.3.13 The Applicant notes that the A57 TransPennine Upgrade Development Consent Order 2022, uses the phrase "materially new or materially worse" environmental effects. Whilst the Applicant has not sought to replicate the drafting in that DCO, following a review of that decision article 2(11) has been added to the draft Order to make clear what the scope of "materially new and materially different" environmental effects includes. The Applicant is mindful that the precedented "materially new or materially different" drafting reflects "wording preferred by the Secretary of State" as confirmed in the decision letter on Great Yarmouth Third River Crossing. Accordingly, the Applicant does not wish to modify this preferred drafting (notwithstanding the A57 decision) but instead wishes to provide the interpretive and clarificatory provision for the following reasons:
 - 4.3.13.1. The drafting confirms that where a proposed change or activity avoids, removes or reduces adverse environmental effects that were reported in the Environmental Statement, a material or non-material amendment to the Order is not required. Requiring a material or non-material amendment to the Order would introduce significant delay and therefore disincentivises appointed contractors from delivering the Proposed Development in a manner with environmentally better outcomes. The Applicant does not consider it is the Secretary of State's intention to place barriers to delivering improved environmental outcomes. It is to be noted that the Secretary of State confirmed that it was not the intention to avoid environmentally better outcomes in the correction notice issued in connection with the A19/A184 Testo's Junction Alternation Development Consent Order. In particular, the Secretary of State confirmed that:

"It is the Secretary of State's view that the recommended wording would allow the necessary scope for changes that are better for the environment providing such changes do not result in significant effects that have not already been previously identified and assessed in the Environmental Statement."

4.3.13.2. As set out in section 3 of this document, the Applicant has necessarily undertaken an environmental assessment which conforms to the "Rochdale envelope" approach (as explained in the Planning Inspectorate's Advice Note 'Content of a Development Consent Order', specifically Paragraph 008 and *R. v Rochdale MBC ex parte Milne (No.*

1) and R. v Rochdale MBC ex parte Tew [1999] and R. v Rochdale MBC ex parte Milne (No. 2) [2000]). The purpose of such an assessment is to ensure that a reasonable worst case scenario is adopted so that mitigation measures which protect the environment on that basis are incorporated. The proposed provision (article 2(11)) in the draft Order is consistent with that approach; and the requirement to ensure an appropriately precautionary assessment should not be read as requiring the delivery of that worst case scenario. Instead, that requirement is properly understood as setting an envelope in which activity and works can be carried out.

4.3.14 Article 2(12) provides that references to the acquisition and creation of rights are to include a reference to acquiring rights in favour of third parties directly, and to any statutory undertaker for the purpose of their undertaking. This ensures that those who are intended to benefit from any compulsory acquisition of rights over land (such as statutory undertakers in respect of their apparatus, or landowners who are intended to have the benefit of replacement land or new accesses) are able to benefit from such acquisition directly. This provision is precedented in the M42 Junction 6 Development Consent Order 2020 (article 2(3)) and the Great Yarmouth Third River Crossing Development Consent Order 2020 (article 2(3)).

Part 2 - Principal Powers

4.4 Article 3 – Development consent etc. granted by this Order

4.4.1 Article 3(1) grants the development consent by giving the Applicant the power to carry out the authorised development, which is described in Schedule 1. This article makes the consent subject to the requirements that are listed in Schedule This provision differs from some made Orders since it does not refer to development consent being granted "within the Order limits". Whilst the scheduled works will be carried out within the Order limits, there are limited activities which the Applicant envisions may need to take place outside of these and the Order provides for this (e.g. articles 204 (Protective works to buildings) and 212 (Authority to survey and investigate land)). These articles are routinely included in DCOs, are necessary to support the delivery of the authorised development and also serve to reduce in scope the amount of land required for temporary powers of possession and/or compulsory acquisition, since the land would otherwise need to be included within the Order limits. The approach therefore reflects the clear intention that such activities should benefit from development consent and should not be subject to a requirement for further planning approval outside the DCO process. The Applicant notes that the

Secretary of State has explicitly endorsed the removal of the phrase "within the Order limits" in the A303 Amesbury to Berwick Down Correction Order "in recognition that the Order provides powers to carry out limited activities beyond the Order limits". This drafting approach does not affect the limits of deviation for the works which are controlled under article 7.

4.4.2 Article 3(2) states that any enactment applying to land within the Order limits has effect subject to the provisions of the Order. Article 3(2) has been included and is necessary in order to ensure that there are no acts of a local or other nature that would hinder the construction and operation of this NSIP. The Applicant has carried out a proportionate search of local legislation that applies within reasonably close proximity to land within the Order limits, but no search can be completely exhaustive and there remains the possibility that a local act or provision may have been overlooked. Including this article ensures that the construction and operation of the authorised development are not jeopardised by any incompatible statutory provisions which might exist, i.e. a provision which would be an absolute restriction that could not be dealt with unless by statutory amendment. The provision would prevent delay in this situation by ensuring that the authorised development could be constructed without impediment. Specific local enactments identified through the Applicant's proportionate search of local legislation are disapplied under article 910 (Disapplication and modification of legislative provisions) via schedule 3 in so far as the provisions still in force are inconsistent with how the powers in the Order can be exercised. Please refer to Schedule 3 where the details of the disapplication of each local legislation is provided. This is a widely precedented article (see most recently article 3(2) of the M42 Junction 6 Development Consent Order 2020 and article 3(2) of the Boston Alternative Energy Facility Order 2023).

4.5 Article 4 - Operation of generating station

- 4.5.1 This permits the operation and use of the generating station comprised in the authorised development and is included pursuant to section 140 of the 2008 Act. Article 4(2) specifically preserves the need for the undertaker to obtain any other operational consent that may be needed for the generating station, in addition to the Order. It is included so that the undertaker has powers to operate the generating station.
- 4.5.2 The drafting by the Applicant is in keeping with recently made energy DCOs. For example, article 4 of The Gate Burton Energy Park Order 2024, article 4 of The Mallard Pass Solar Farm Order 2024, article 4 of The Cottam Solar Project Order 2024, article 4 of the Longfield Solar Farm Order 2023 and article 11 of the Little Crow Solar Park Order 2022.

4.6 Article 5 – Maintenance of the authorised development

4.6.1 This article empowers the Applicant to maintain the Proposed Development. "Maintain" is defined in article 2(1) (see para 4.3.3.4 above). Maintenance of the authorised development, within the meaning that would be authorised by this article, has been assessed in the **Environmental Statement** [EN010157/APP/6.1], and the power is constrained, through the definition of "maintain", by the proviso that maintenance works must not give rise to any materially new or materially different environmental effects in comparison with those reported in the Environmental Statement.

4.7 Article 6 - Maintenance of drainage works

- 4.7.1 The purpose of this article is to make it clear that nothing in the Order or any of the authorised works affect the existing allocation of responsibility for maintenance of any works connected to the drainage of the land, unless this is agreed between the Applicant and the responsible party. Responsibility for maintenance of drainage works may sit with the Environment Agency, an internal drainage board, a Lead Local Flood Authority or a landowner. This is to avoid any confusion as to future maintenance.
- 4.7.2 This provision is well precedented (see article 6 of the M25 Junction 10/A3 Wisley Interchange Development Consent Order 2022, article 5 of the M25 Junction 28 Development Consent Order 2022 and article 5 of the Boston Alternative Energy Facility Order 2023).

4.8 Article 7 - Limits of Deviation

- 4.8.1 This article is included to allow for flexibility for the works to be carried out and maintained within the limits identified on the works plans and that these may only be amended where it is demonstrated to the local planning authority's satisfaction (and the local planning authority has certified accordingly) that such deviation would not give rise to any materially new or materially different environmental effects in comparison with those reported in the Environmental Statement.
- 4.8.2 The purpose of this provision is to provide the Applicant with a proportionate degree of flexibility when constructing the Proposed Development, reducing the risk that the Proposed Development as approved cannot later be implemented for unforeseen reasons but at the same time ensuring that the Applicant is only permitted to exceed the limits of deviation—if it can demonstrate to the local

planning authority's satisfaction that no materially new or materially different environmental effects would arise. The wording of the exception in paragraph (1) of article 7 is precedented, see article 6(2) of the M42 Junction 6 Development Consent Order 2020, article 7(1) of the Boston Alternative Energy Facility Order 2023 and article 6 of the London Luton Airport Expansion Development Consent Order 2025.

4.8.3 Paragraph (2) clarifies that the process set out in Part 2 of Schedule 2 to the Order, which applies in relation to applications to discharge any of the requirements in Part 1 of Schedule 2, will also apply to any application to the local planning authority for certification under paragraph (1), as though it were an application for approval under the requirements. This ensures there is a clear, defined process in place for applications to the local planning authority under this article. Paragraph (2) is similar to article 6(2) of the A19 Downhill Lane Junction Development Consent Order 2020, article 7(2) of the Boston Alternative Energy Facility Order 2023 and identical to article 6(4) of the London Luton Airport Expansion Development Consent Order 2025.

4.94.8 Article 78 - Benefit of the Order

- 4.9.14.8.1 Article 87—overrides section 156(1) of the 2008 Act (as permitted by section 156(2)) to give the benefit of the Order to the Applicant rather than anyone with an interest in the land. It would be impracticable for a variety of landowners to implement parts of the Order in an uncoordinated manner, which might be the case if the provisions of section 156(1) of the 2008 Act were left remain unmodified.
- 4.9.24.8.2 The drafting by the Applicant is in keeping with recently made energy DCOs. For example, article 31 of Sunnica Energy Farm DCO 2024, article 32 (1) of The Gate Burton Energy Park Order 2024, article 34 of The Mallard Pass Solar Farm Order 2024 and article 34(1) of The Cottam Solar Project Order 2024.

4.104.9 Article **89** – Consent to transfer benefit of Order

4.10.14.9.1	This article makes detailed provision for the transfer of the
bei	nefit of the Order and supplements article 78. Under article 89, the consent of
the	Secretary of State is needed before the undertaker can transfer the benefit of
the	Order, but such consent is not required where:

4.10.1.1.4.9.1.1. the transferee or lessee is the holder of a licence under section 6 of the Electricity Act 1989

- 4.10.1.2.4.9.1.2. where the compensation provisions for the acquisition of rights or interests in land or for effects on land have been discharged or are no longer relevant; or
- 4.10.1.3.4.9.1.3. the transfer or grant is made to Northern Powergrid Holding Company for the purposes of Work Nos 4A, 4B and 6.
- 4.10.24.9.2 The drafting of article 89 is in keeping with recently made energy DCOs. For example, article 33 of The Gate Burton Energy Park Order 2024, article 35 of The Mallard Pass Solar Farm Order 2024 and article 35 of The Cottam Solar Project Order 2024.
- 4.10.34.9.3 The justification for the provisions in article 89 is that in such cases, the transferee or lessee will either be of a similar financial and regulatory standing to the undertaker so as to protect the provision for compensation for rights or interests in land that are compulsorily acquired pursuant to the Order, or there are no outstanding actual or potential compulsory acquisition claims. Article 89(4) provides that where the consent of the Secretary of State is not needed, the undertaker must still notify the Secretary of State in writing prior to the transfer or grant of the benefit of the provisions of the Order.

4.114.10 Article **910** – Disapplication and modification of legislative provisions

- 4.11.14.10.1 This article provides (pursuant to section 120(5)(a) of the 2008 Act) for the disapplication in relation to the authorised development of certain requirements which would otherwise apply under general legislation. Section 120(5)(a) provides that an order granting development consent may apply, modify or exclude a statutory provision which relates to any matter for which provision may be made in the order. This article is substantially the same as article 6 of the Cottam Solar Project Order 2024, the Gate Burton Energy Park Order 2024 and the Mallard Pass Solar Farm DCO 2024.
- 4.11.24.10.2 More specifically, this article provides for the disapplication of various consents which would otherwise be required from the statutory nature conservation body, the Environment Agency, internal drainage boards or a Lead Local Flood Authority, or under the Environmental Permitting (England and Wales) Regulations 2016, the Water Resources Act 1991 or the Land Drainage Act 1991. The following provisions are disapplied under this article:
 - 4.11.2.1.4.10.2.1. provisions prohibiting the placing of obstructions in waterways which are not main rivers under the Land Drainage Act 1991

- a consent under section 150 of the 2008 Act is required for section 23 of the Land Drainage Act 1991 (but not sections 30 and 32) and discussions are ongoing with the drainage authorities;
- 4.11.2.2.4.10.2.2. byelaws made under the Land Drainage Act 1991 regulating the use and obstruction of watercourses this disapplication prevents any inconsistency arising between the works authorised under the Order and byelaws. This is not a provision which requires consent under section 150 of the 2008 Act:
- 4.11.2.3.4.10.2.3. byelaws made or deemed to have been made under the Water Resources Act 1991 a consent under section 150 of the 2008 Act is required and discussions are ongoing with the Environment Agency as the appropriate agency (as defined in the Water Resources Act 1991);
- 4.11.2.4.4.10.2.4. provides for a disapplication in respect of the temporary possession provisions of the Neighbourhood Planning Act 2017. This is required as the relevant sections of the Neighbourhood Planning Act 2017 have not been brought into force, subsidiary regulations to that Act have not yet been made, and there is therefore no certainty as to the requirements of the new temporary possession regime. As such, this enables the temporary possession regime created by this Order to be applied; and
- 4.11.2.5.4.10.2.5. requirements for an environmental permit for the carrying on of flood risk a consent under section 150 of the 2008 Act is required and the Environment Agency has given this consent on the basis that Protective Provisions for the Environment Agency are included in the Order.
- 4.11.34.10.3 In addition, the Applicant has conducted a review of any local legislation that might conflict with the powers and rights sought in the Order. The Applicant has included a list of the historic legislation that it seeks to disapply in Schedule 3, which relates to matters in the vicinity of the Order limits. This list has been prepared taking a precautionary approach, because in some cases it was difficult to conclusively determine whether or not the provisions of the legislation were relevant to the Order, particularly in cases where plans were not available in respect of the historic legislation. Article 910 disapplies the legislation listed in Schedule 3 in so far as the provisions still in force are inconsistent with how the powers in the Order can be exercised. The Applicant considers that, due to the importance of NSIPs, it is expedient to disapply these provisions in order to ensure that the Proposed Development can be implemented as intended in the Order.

- 4.11.44.10.4 Article 910 also applies section 9 of the Forestry Act 1967 to any felling required as a result of the authorised development. Section 9(1) of the 1967 Act provides that a Forestry Commission licence is required for felling growing trees. Section 9(4)(d) disapplies the requirement from felling required to implement development authorised by a planning permission - but not to development authorised by a DCO. Paragraph (3) of article 910 extends the exception to any trees felled as a result of the authorised development. 4.11.54.10.5 Paragraph (4) in effect disapplies the Community Infrastructure Levy Regulations 2010, by making clear that any building comprised in the authorised development is to be deemed to be of a type that does not trigger liability for payment of the Community Infrastructure Levy. 4.11.64.10.6 The Applicant has produced an Other Consents and
- out in greater detail the proposed approach to obtaining the other consents required for the Proposed Development.

 4.124.11 Article 101 Defence to proceedings in respect

Licences Statement [EN010157/APP/5.9] as part of this application. This sets

4.124.11 Article 101 - Defence to proceedings in respect of statutory nuisance

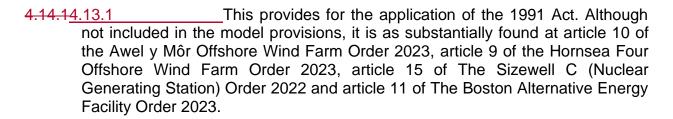

- 4.12.14.11.1 Section 158 of the Act confers statutory authority for the purposes of a defence in statutory nuisance generally, subject to any contrary provision made by a particular DCO. This article is such a contrary provision, amending the terms of the defence in the case of a nuisance falling within paragraph (d) or (g) of section 79(1) of the Environmental Protection Act 1990, which relates to dust, steam, smell, noise or any other statutory nuisances created in the course of carrying out construction, use, maintenance or decommissioning of the authorised development or which is an unavoidable consequence of the authorised development.
- 4.12.24.11.2 The defence is available if the nuisance relates to:
 - 4.12.2.1.4.11.2.1. the construction, maintenance or decommissioning of the authorised development, and is in accordance with any controls imposed by the local authority under the Control of Pollution Act 1974, or cannot reasonably be avoided; or
 - 4.12.2.4.11.2.2. the construction, maintenance and decommissioning of the authorised development and cannot reasonably be avoided.

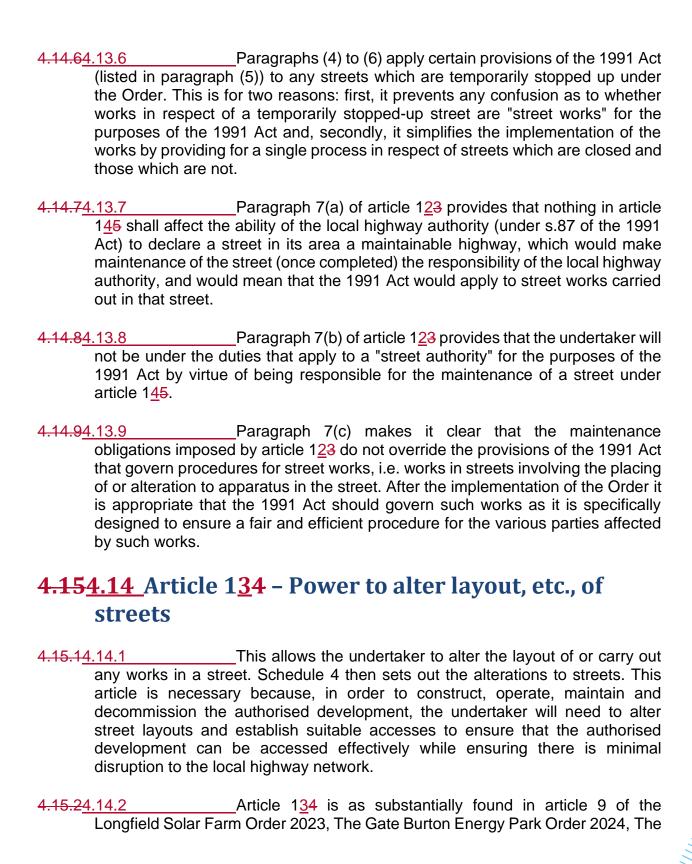

4.14 4.13 Article **123** - Application of the **1991** Act

- 4.14.24.13.2 Article 123 modifies the application of the New Roads and Street Works Act 1991 (the 1991 Act) to works carried out under the powers of the Order. This is required because street works will be carried out under Order powers subject to the provisions and requirements of the Order and not, for instance, under Highways Act 1980 powers.
- 4.14.34.13.3 Paragraph (1) provides that works carried out under the powers of the Order which match the description of "major highway works" in the 1991 Act will be treated as major highways works for the purposes of the 1991 Act. The effect of this is to clarify that the provisions for sharing the burden of dealing with apparatus in the street (under sections 84 and 85 of the 1991 Act), which would normally apply only to major works carried out by the highway authority, will apply in respect of the works authorised by the Order irrespective of who in fact carries them out.
- 4.14.44.13.4 "Major Highways Works" are defined at section 86 of the 1991 Act. The definition includes, at sub-sections 86(3)(b) and (f), works undertaken under powers conferred by sections 64 and 184 the Highways Act 1980. As that would not be relevant in this context (where the works will be undertaken under the powers of the Order), these sub-sections are omitted from paragraph (1)(a). Works equivalent to works undertaken under those sections of the Highways Act 1980, but carried out under powers conferred by the Order, are included through paragraph 1(b). The effect is that any works which would be "major highway works" under the 1991 Act if carried out by a highway authority in relation to one of its streets are also "major highway works" if carried out under the powers of the Order regardless of who carries them out.
- 4.14.54.13.5 Paragraph (3) provides that certain provisions of the 1991 Act listed in that paragraph will not apply. The disapplication of these provisions (which are designed primarily to regulate the carrying out of street works by utility companies in respect of their apparatus) is appropriate given the scale of works proposed under the Order, the specific authorisation given for those works by the Order and the specific provisions in the Order which regulate the carrying out of the Order works.

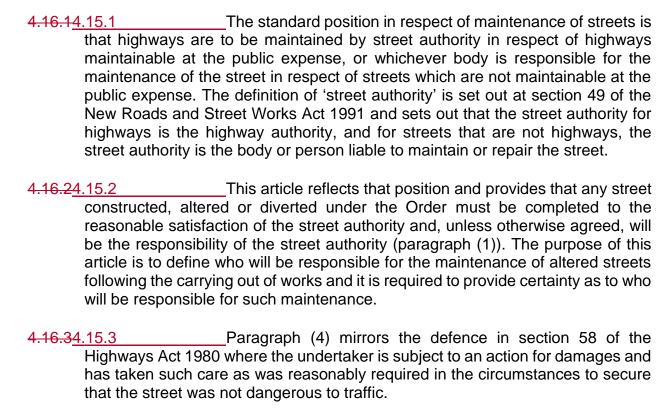

Mallard Pass Solar Farm Order 2024, The Cottam Solar Project Order 2024 and The Sunnica Energy Farm Order 2024.

4.164.15 Article 145 - Construction and maintenance of altered streets

4.16.44.15.4 Article 145 is as substantially found in article 10 of the following made DCOs: The Gate Burton Energy Park Order 2024, The Cottam Solar Project Order 2024, The Sunnica Energy Farm Order 2024 and The Mallard Pass Solar Farm Order 2024.

4.174.16 Article 156 – Temporary closure or restriction of streets and public rights of way

4.17.14.16.1 This article allows for the temporary closure, alteration, diversion or restriction of the use of streets for the purposes of, or in connection with, the construction, operation, maintenance and decommissioning of the authorised development. It is required because the use of certain streets will

become incompatible with the carrying out of the authorised development at certain stages.

- 4.17.24.16.2 Access for pedestrians must be provided, and consent to any such closing or restriction must be sought from the street authority. Paragraph (1) relates to streets in Part 1 of Schedule 5 and the public rights of way in Part 2 of Schedule 5 and Paragraph (2) provides a general power.
- 4.17.34.16.3 Paragraph (3) confers a power on the Applicant where the use of a street, within the Order limits, has been temporarily closed, altered, diverted or restricted under this article to use it as a temporary working site. This provision is in keeping with a number of made DCOs including article 11(6) of The Sunnica Energy Farm Order 2024 and article 11(6) of The Mallard Pass Solar Farm Order 2024.
- 4.17.44.16.4 Paragraph (4) states that reasonable access for pedestrians going to or from properties abutting a temporarily closed, altered, diverted or restricted street must be provided. This provision has precedent in a number of made DCOs including article 11(2) of The Gate Burton Energy Park Order 2024, article 11(2) of The Mallard Pass Solar Farm Order 2024 and article 11(2) of The Cottam Solar Project Order 2024.
- 4.17.54.16.5 Paragraph (5) confirms that the Applicant must not temporarily close, alter, divert or restrict any street or public right of way without the consent of the street authority (such consent not to be unreasonably withheld or delayed). This provision has precedent in a number of made DCOs including article 11(4) of The Gate Burton Energy Park Order 2024, article 11(4) of The Mallard Pass Solar Farm Order 2024 and article 11(4) of The Cottam Solar Project Order 2024.
- 4.17.64.16.6 Paragraph (6) provides a right to compensation for any person suffering loss due to the suspension of a private right of way under this article. There is precedent for this in article 11 of The Gate Burton Energy Park Order 2024, The Mallard Pass Solar Farm Order 2024, The Cottam Solar Project Order 2024.
- 4.17.74.16.7 Paragraph (7) enables the temporarily stopping up, prohibition of the use, restriction of use, alteration or diversion, of any public rights of way added to the definitive map and statement (within the meaning of the Wildlife and Countryside Act 1981) on or after the date of the close of the examination into the application for the Order. The power is appropriately limited because it only applies to public rights of way that are within the Order limits and to new public rights of way that were not recognised in the definitive map and statement throughout the application or Examination process. The wording aligns

with made DCO precedent. For example, it is used to protect against the risk of new Tree Preservation Orders in The Gate Burton Energy Park Order 2024 (article 11).

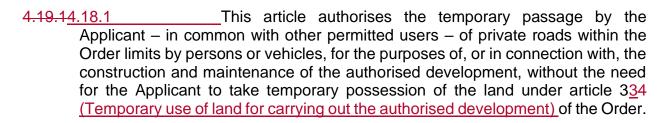

4.17.84.16.8

Paragraph (8) imposes a time limit of 28 days after which a street authority which fails to respond to an application for consent is deemed to have granted consent, so as not to delay the Proposed Development unnecessarily. This provision has been used in other DCOs (see National Grid (North London Reinforcement Project) Order 2014, article 12 of the A19/A184 Testo's Junction Alteration Development Consent Order 2018, article 16 of The A47/A11 Thickthorn Junction Development Consent Order 2022, article 16 of The A47 Wansford to Sutton Development Consent Order 2023 and article 10 of the Cleve Hill Solar Park Order 2020). This approach is considered justified as the works proposed under paragraph (5) are temporary in nature and, this provision will provide greater flexibility and certainty in delivering the authorised development.

4.18<u>4.17</u> Article 1<u>6</u>**7** - Access to works

4.18.14.17.1 This article is a Model Provision which gives the undertaker powers to form new or to improve existing means of access for the purposes of the authorised development, as set out in Schedule 6 to the Order. This article is necessary because the undertaker will need to create or improve existing means of access for the purposes of the authorised development. The article also provides that other means of access or works can also be provided in other locations reasonably required for the authorised development with the approval of the local planning authority. This approach is broadly precedented by article 12 of The Gate Burton Energy Park Order 2024, article 13 of The Mallard Pass Solar Farm Order 2024 and article 13 of The Cottam Solar Project Order 2024.

4.19 4.18 Article 1 78 - Use of private roads

4.19.24.18.2 This article therefore creates a power to "use" a private road for a temporary period that is proportionate to the limited nature of the use, rather than extinguishing, suspending or permanently interfering with the private rights

of a landowner (through the acquisition of a permanent right). This is akin to the powers for temporary use under article 334 (temporary use of land for carrying out the authorised development) of the Order; however, it is distinguished because the Applicant does not require the exclusive use and possession of the private roads while exercising this power.

4.19.34.18.3 Paragraph (2) provides that the Applicant will be liable to compensate any person who has suffered loss or damage as a result of the exercise of this power. Paragraph (3) is included to clarify that any dispute as to a person's entitlement to compensation, or as to the amount of such compensation, is to be determined under Part 1 of the Land Compensation Act 1961.

4.19.44.18.4 There is precedent for this article, for example in the Port of Tilbury (Expansion) Order 2019 (article 16) and the Lake Lothing (Lowestoft) Third Crossing Order 2020 (article 14). The Applicant is aware the Secretary of State removed this power in The Gate Burton Energy Park Order 2024, however the Applicant requires this power as it is likely to require the use of Carr Lane which is a private road within the Order limits. Should this power not be included in the Order, the Applicant would be required to reach agreement with landowners which could act as an impediment to the implementation of the Proposed Development or the Applicant would be required to use compulsory acquisition powers in circumstances where only temporary and non-exclusive use rights are required.

4.204.19 Article 189 - Traffic regulation measures

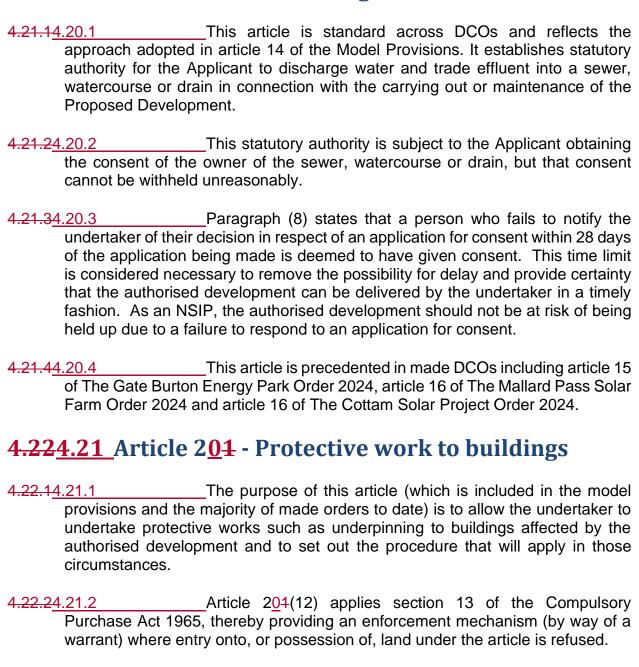

This article provides the undertaker with powers to place 4.20.14.19.1 temporarily traffic signs and signals and other temporary traffic regulation measures for the purposes of safety and in relation to the authorised development. The inclusion of this power is justified as it allows a degree of flexibility to respond to changing conditions on the road network over the lifetime of the authorised development. As introduced in paragraph (1), Schedule 7 (traffic regulation measures) sets out specific traffic regulation measures that the Applicant may make. The general power in paragraph (2) is appropriately regulated, via paragraph (4) as it may only be exercised with the consent of the traffic authority concerned, following consultation with the relevant chief officer of the police. The article is not in the general Model Provisions but is common in orders granting permission for infrastructure projects where it is necessary in the interests of public safety during construction of the authorised development for the undertaker to put in place some temporary restrictions on road usage. The powers under this article are provided for in section 120(5)(a) of the 2008 Act. For example, similar provision is contained within article 14 of The Gate Burton

Energy Park Order 2024, article 15 of The Mallard Pass Solar Farm Order 2024 and article 15 of The Cottam Solar Project Order 2024.

Part 4 - Supplementary Powers

4.21<u>4.20</u> Article <u>19</u><u>20</u> – Discharge of water

4.22.34.21.3 This is another standard provision with broad precedent and is broadly similar to article 16 of The Gate Burton Energy Park Order 2024, article 17 of The Mallard Pass Solar Farm Order 2024 and article 18 of The Cottam Solar Project Order 2024.

4.234.22 Article 212 - Authority to survey and investigate the land

- 4.23.14.22.1 This article gives the Applicant the power to enter certain land for the purpose of surveying and investigating. This enables the Applicant to assess the effects of the authorised development on land outside the Order limits and also assess the effects of land outside the Order limits on the authorised development. The effect of providing such a power over land outside of the Order is to remove the necessity to compulsorily acquire that land or rights over that land and thus reduce the land brought within the Order limits.
- 4.23.24.22.2 Protection is given in the article to rights of landowners. The article provides that the Applicant must give no less than 14 days' notice before exercising the powers of entry, and that compensation is payable for any loss or damage. Paragraph (7) clarifies that the provisions of the Compulsory Purchase Act 1965 will apply to the refusal by the owner of the land to grant the Applicant access to enter land for the purpose of surveying and investigating it.
- 4.23.34.22.3 This is another standard provision with broad precedent such as article 17 of The Gate Burton Energy Park Order 2024, article 18 of The Mallard Pass Solar Farm Order 2024 and article 19 of The Cottam Solar Project Order 2024.

Part 5 - Powers of Acquisition

4.244.23 Article 223 - Compulsory acquisition of land

4.24.14.23.1 This article authorises the acquisition of land by compulsory acquisition. It grants the power to acquire such of that land as is required for the Proposed Development. The power of acquisition over the Order land is qualified and restricted by sub-paragraph (2), in the case of parcels of land specified in the Order where only rights are required (article 256), acquisition of subsoil only (article 2930), rights under or over streets (article 323), where possession of land parcels as specified in the Order may be taken temporarily only (article 334) or where land is subject to crown rights (article 404). It is also qualified and

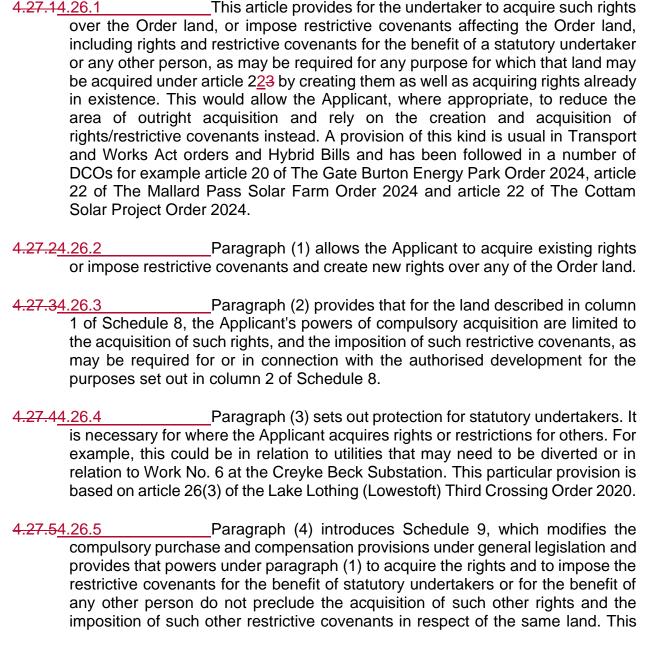

restricted by reference to article 245 (time limit for exercise of authority to acquire land compulsorily). 4.24.24.23.2 The provision is necessary to secure the delivery of the Proposed Development as set out in more detail in the Statement of Reasons [EN010157/APP/4.1] accompanying the application. 4.24.34.23.3 This is another standard provision with broad precedent such as article 17 of The Sunnica Energy Farm Order 2024 and article 19 of The Mallard Pass Solar Farm Order 2024. 4.254.24 Article 234 - Compulsory acquisition of land incorporation of the mineral code 4.25.14.24.1 This article incorporates Parts 2 and 3 of Schedule 2 of the Acquisition of Land Act 1981. This means that where the Applicant acquires land under the powers of the Order, it will not acquire any mineral deposits present in the land (other than those necessarily extracted or used in constructing the authorised development) unless they are expressly included in the conveyance. Such an article is included in the Model Provisions (article 19) and is necessary to exempt mines and mineral interests from compulsory acquisition under the Order. 4.25.24.24.2 This is another standard provision with broad precedent such as article 21 of The Mallard Pass Solar Farm Order 2024 and article 47 of The Cottam Solar Project Order 2024. 4.264.25 Article 245 - Time limit for exercise of authority to acquire land compulsorily This article gives the Applicant five years to issue "notices to 4.26.14.25.1 treat" or to execute a "general vesting declaration" to acquire the land that is subject to the power of compulsory acquisition. These are the two main procedural methods by which the process of acquiring land is undertaken should this Order be made. 4.26.24.25.2 The article also sets a 5 year time limit on the power of the Applicant to take temporary possession of land under article 334, although it does not prevent them remaining in possession of land after that time if it took possession within the 5 year limit (this has consistently been approved by the Secretary of State, see for example article 24 of The National Grid (Yorkshire

Green Energy Enablement Project) Development Consent Order 2024, article 19 of The Gate Burton Energy Park Order 2024, article 20 of The Mallard Pass Solar Farm Order 2024 and article 21 of The Cottam Solar Project Order 2024. This article was also included in the Model Provisions as article 20.

4.274.26 Article 256 - Compulsory acquisition of rights and imposition of restrictive covenants

particular provision is based on article 26(4) of the Lake Lothing (Lowestoft) Third Crossing Order 2020.

4.27.64.26.6 Paragraph (5) also refers to Schedule 9, which modifies the compulsory purchase and compensation provisions under general legislation. The modifications do not affect the entitlement to compensation, but generally ensure that the compensation code applies equally to the additional categories of acquisition covered by the Order – the creation of new rights and the imposition of restrictive covenants in particular. This is a consequence of the extension of land acquisition powers to these categories and is commonplace in Transport and Works Act orders and DCOs, such as the article 20(3) of The Gate Burton Energy Park Order 2024, article 22(3) of The Mallard Pass Solar Farm Order 2024 and article 22(3) of The Cottam Solar Project Order 2024.

4.27.74.26.7 For the purpose of section 126(2) of the 2008 Act, the relevant compensation provisions are modified only to the extent necessary to ensure that they apply properly to the acquisition of rights, and not to affect the amount of compensation to which landowners would be entitled. The schedule is heavily precedented and reflects the drafting in Schedule 10 of The Gate Burton Energy Park Order 2024, The Mallard Pass Solar Farm Order 2024 and The Cottam Solar Project Order 2024 with the exception of the final paragraph which amends the Compulsory Purchase of Land (Vesting Declarations) (England) Regulations 2017 (the 2017 Regulations) (see further article 267 below).

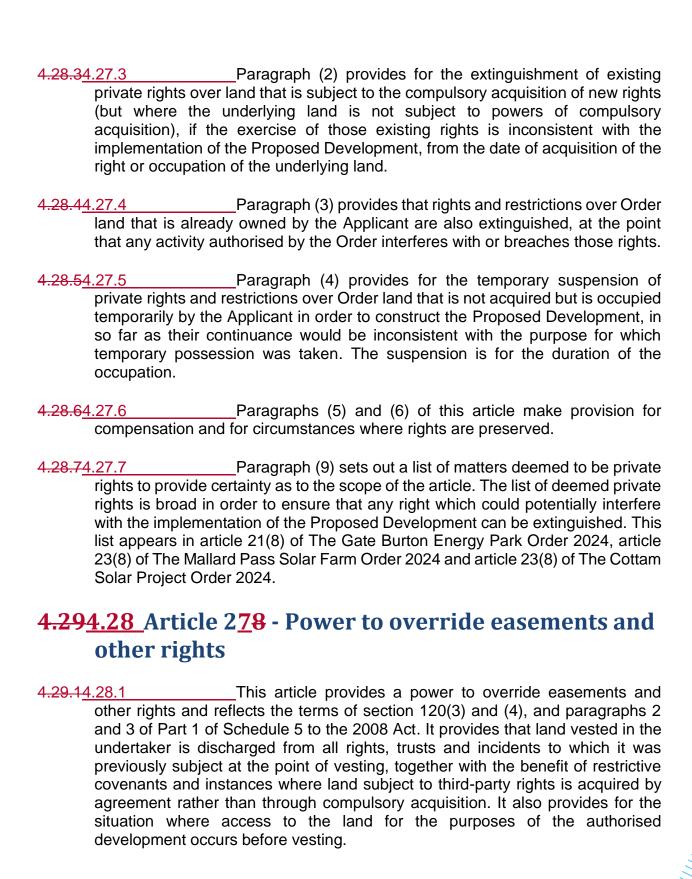

4.27.84.26.8 Paragraph (5) also provides that, where the Applicant needs only to acquire rights over land, it shall not be obliged to acquire any greater interest in that land.

4.284.27 Article 267 - Private rights over land

4.28.14.27.1 In order for it to be possible to implement the Proposed Development, provision is needed for the extinguishment of private rights and restrictions in the Order land that would be incompatible with that implementation. Article 267 supplies that provision and is substantially the same as article 21 of The Gate Burton Energy Park Order 2024, article 23 of The Mallard Pass Solar Farm Order 2024 and article 23 of The Cottam Solar Project Order 2024.

4.28.24.27.2 Paragraph (1) provides for the extinguishment of private rights and restrictions over Order land subject to compulsory acquisition under the Order, from the moment of acquisition (whether compulsorily, by agreement or through grant of a lease of the land) or occupation of that land.

4.29.24.28.2 Sections 203 to 205 of the Housing and Planning Act 2016 relate to the power (in section 203) to override easements and other rights, and to the provision of compensation for such interference (section 204). The implications of this power are wide-ranging – for instance, the power applies in respect of all types of interests and rights, in cases where there is planning consent (the definition of which includes development consent under the 2008 Act, as per section 205) for the works causing the interference, and the land has been appropriated or acquired, or could be acquired compulsorily, in connection with those consented works. Notwithstanding the above, the inclusion in the Order is necessary because this article authorises interference with easements and other rights not only where necessary in connection with the carrying out of building or maintenance work (as is the case where section 203 of the Housing and Planning Act 2016 applies) but also in connection with the exercise of any power authorised by the Order.

4.29.34.28.3 The power in this article is necessary and proportionate to enable the delivery of the authorised development while ensuring that provision is made for compensation to be paid to affected persons whose interests in or rights over land may be subject to interference arising therefrom. The drafting is precedented (see, for example, article 29 of the Lake Lothing (Lowestoft) Third Crossing Order 2020 and article 27 of the Riverside Energy Park Order 2020 and is substantially the same as article 24 of The Longfield Solar Farm Order 2023, article 24 of The Gate Burton Energy Park Order 2024, article 26 of The Mallard Pass Solar Farm Order 2024 and article 26 of The Cottam Solar Project Order 2024).

4.304.29 Article 289 - Application of the 1981 Act

4.30.14.29.1 This article applies (with minor modifications to make the provisions appropriate to the context of acquisition under powers in a DCO) the provisions of the Compulsory Purchase (Vesting Declarations) Act 1981 (the 1981 Act) to compulsory acquisition under the Order so that the Applicant has the option of acquiring Order land that is subject to the powers of compulsory acquisition by vesting declaration.

4.30.24.29.2 Vesting declarations are one of two ways of acquiring land that is subject to compulsory purchase. The other method involves serving a notice to treat on the land owner to commence the process of establishing the acquisition price, after which title in the land is transferred. The date on which title will transfer is uncertain under the notice to treat method.

4.30.34.29.3 A vesting declaration, in contrast, sets the date on which title in the land is transferred to the acquiring authority. Compensation is negotiated

or determined and paid later. Vesting declarations, therefore, allow title in the land to pass to the acquirer more quickly than using the notice to treat method, and also allow several parcels to be acquired at once. Their use is subject to serving notices and observing time limits as required by the 1981 Act (as amended by the Housing and Planning Act 2016).

4.30.44.29.4 The modifications ensure consistency with the 5 year period sought under the Order for acquisition of rights. It further ensures that the appropriate references are made to the Act. The modifications are based in large part on previous DCOs, and following amendments to the 1981 Act in the Housing and Planning Act 2016, the High Speed Rail (London - West Midlands) Act 2017. This approach is precedented in numerous DCOs including the Drax Power (Generating Stations) Order 2019 (article 24), the Cleve Hill Solar Park Order 2020 (article 20) and the Cottam Solar Project Order 2024 (article 24).

4.30.54.29.5 Paragraphs (3), (5) (11), (12) and (13) are intended to facilitate the compulsory acquisition of rights for the benefit of a third party such as a statutory undertaker. These provisions are not contained in the Model Provisions but are simply consequential amendments intended to provide confirmation that the 1981 Act can be used to acquire rights and land on behalf of third parties, without the need to acquire the land or rights in favour of the Applicant and then transfer such land or rights to a third party, thereby causing a delay to any transfers of land or rights to those who are intended to benefit from such acquisition. This approach is precedented in article 33 of The Cambridge Waste Water Treatment Plant Relocation Order 2025 and article 31 of The A122 (Lower Thames Crossing) Development Consent Order 2025.

4.314.30 Article 2930 - Acquisition of subsoil only

4.31.14.30.1 This article allows the Applicant to acquire land below the surface rather than having to acquire all of the land.

4.31.24.30.2 The purpose of this article is to give the Applicant the flexibility to minimise so far as is possible the extent of interests to be acquired, with consequently less impact on affected landowners, and lower payments of compensation. This too is a standard provision used in many DCOs (see for example article 21 of The Cleve Hill Solar Park Order 2020, article 23 of The Longfield Solar Farm Order 2023, article 23 of The Gate Burton Energy Park Order 2024, article 25 of The Mallard Pass Solar Farm Order 2024 and article 25 of The Cottam Solar Project Order 2024).

4.324.31 Article 301 - Modification of Part 1 of the Compulsory Purchase Act 1965

4.32.14.31.1 This article modifies the provisions of Part 1 of the Compulsory Purchase Act 1965 (the 1965 Act) as applied to the Order by section 125 of the 2008 Act. In accordance with section 126(2) of the 2008 Act, these provisions are modified only to the extent necessary to ensure that they apply properly to the compulsory acquisition powers authorised by the Order. These modifications have broad precedent in article 26 of the Southampton to London Pipeline Development Consent Order 2020, article 29 of the Riverside Energy Park Order 2020, article 22 of the Cleve Hill Solar Park Order 2020, article 25 of The Gate Burton Energy Park Order 2024, article 27 of The Mallard Pass Solar Farm Order 2024 and article 27 of The Cottam Solar Project Order 2024.

4.334.32 Article 312 – Modification of the 2017 Regulations

- 4.33.14.32.1 This article modifies the Compulsory Purchase of Land (Vesting Declaration) (England) Regulations 2017 to ensure that the interests and rights in land which are intended to benefit a third party, such as a statutory undertaker whose apparatus may be re-located in order to construct the Proposed Development, will vest in that third party instead of the Applicant, which would otherwise be the acquiring authority in respect of those interests and rights.
- 4.33.24.32.2 The amendments to these regulations, as well as the changes described in paragraph 4.2930.5 above, confirm the position that notwithstanding references in the 1981 Act and 2017 Regulations to vesting land "in themselves" (i.e., in the Acquiring Authority), land and rights can be acquired by the Applicant in favour of any third party identified directly. This is a drafting change which confirms the ability for the Applicant to acquire such rights and land (where such powers of acquisition are not transferred to another person to acquire rights/land directly), and is not a substantive change to the rights or land sought for permanent acquisition.
- 4.33.34.32.3 This article, as well as the changes to the 1981 Act, are justified for the Proposed Development because the Applicant is proposing to vest land and rights in third parties, for example rights in relation to utilities assets to statutory undertakers. In the absence of these provisions, the transfer of the land to those third parties would be delayed requiring first the acquisition of the land and rights by the Applicant, registration at the Land Registry and then the subsequent transfer to the relevant third party and further registration at the Land Registry. Such a delay could give rise to unintended and undesirable

consequences, for example, preventing statutory undertakers accessing their assets. It also imposes an administrative burden. The Applicant notes the Secretary of State has previously endorsed the principles of vesting land directly in third parties (see, for example, article 30(2) of the Cornwall Council (A30 Temple to Higher Carblake Improvement) Order 2015, article 30(2) of the Lancashire County Council (Torrisholme to the M6 Link (A683 Completion of Heysham to M6 Link Road)) Order 2013) and article 32 of The A122 (Lower Thames Crossing) Development Consent Order 2025.

4.344.33 Article 323 - Rights under or over streets

4.34.14.33.1 The purpose of this article is to allow the Applicant to appropriate and use land above or below streets within the Order land, without having to acquire the street or any right or easement in it. The exercise of this power, without full acquisition, is prohibited in the circumstances set out in paragraph (3). Compensation is payable for any loss or damage caused to an owner or occupier of land affected by the power of appropriation where no acquisition has taken place.

4.34.24.33.2 This article was included in the Model Provisions and the majority of DCOs made to date. It is considered that the article remains necessary for the authorised development, notwithstanding the effect of the Housing and Planning Act 2016, and it was retained in recent DCOs (see, for example, article 32 of the M42 Junction 6 Development Consent Order 2020, article 30 of the Riverside Energy Park Order 2020, article 26 of The Longfield Solar Farm Order 2023, article 26 of The Gate Burton Energy Park Order 2024, article 28 of The Mallard Pass Solar Farm Order 2024 and article 28 of The Cottam Solar Project Order 2024).

4.354.34 Article 334 - Temporary use of land for carrying out the authorised development

4.35.1 <u>4.34.1</u>	The purpose of this a	irticle is, inte	er alia, to	allow lar	id to be
occupied temporaril	y while the works are c	carried out.			

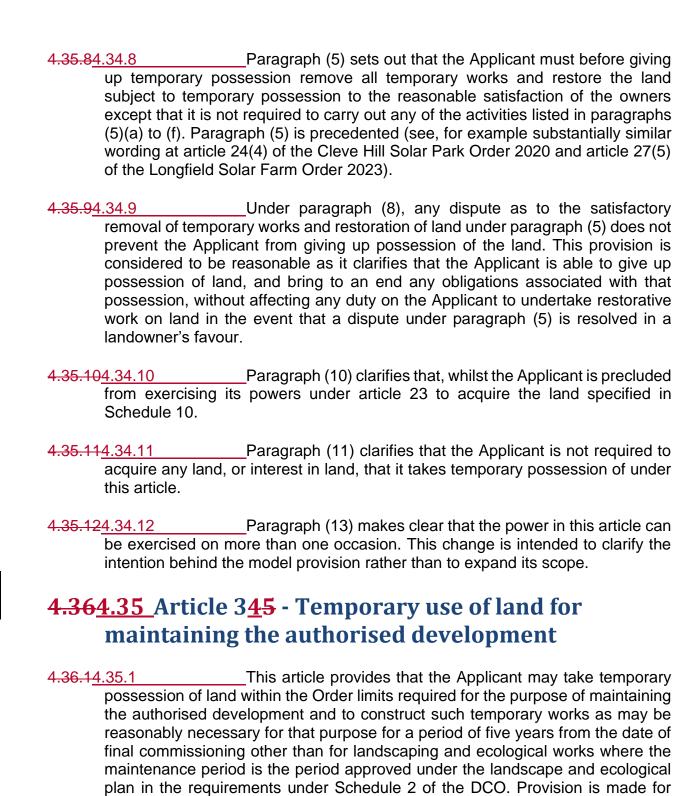

4.35.24.34.2 The inclusion of this article is important to ensure that the authorised development can be carried out efficiently and expeditiously following the making of the Order. The Applicant is entitled either to occupy and use land pending its permanent acquisition, or to temporarily occupy and use land in Schedule 10, with provision made for the restoration of the land (subject to exceptions listed in paragraph (5) and the payment of compensation to the affected landowners and occupiers for any loss or damage arising. These powers

are considered to be reasonable given the status of the authorised development as an NSIP.

- 4.35.34.34 Similar temporary possession provisions have been included in a large number of made DCOs, including (most recently) The Longfield Solar Farm Order 2023 (article 27), the Boston Alternative Energy Facility Order 2023 (article 33), The Sunnica Energy Farm Order 2024 (article 26), The Gate Burton Order 2024 (article 27) and The Mallard Pass Solar Farm Order 2024 (article 29) and The Cottam Solar Project Order 2024 (article 29).
- 4.35.44.34.4 More particularly, paragraph (1)(a)(i) allows the land set out in Schedule 10 to be used temporarily and prevents the Applicant having to permanently acquire land which is required to construct the authorised development but which is not needed permanently and therefore assists in minimising the interference with landowners' rights. In line with this, paragraph (1)(e) confirms that the authorised development as listed in Schedule 1 can be undertaken on land that has been temporarily occupied.
- 4.35.54.34.5 Paragraph (1)(a)(ii) allows for the temporary occupation of any of the Order land that is subject to the powers of permanent acquisition, but in respect of which no process for acquisition has yet been commenced. The rationale for this is that it reduces the amount of land that is required to be subject to outright acquisition. Thus, article 223 with article paragraph (1)(a)(ii) make it possible for the Applicant to occupy land temporarily initially and only proceed to acquire permanently that part which is necessary for the authorised development as constructed. The benefits of this are lesser impacts on landowners and lower costs to the Applicant, which is in the public interest. In line with this, paragraph (1)(e) confirms that the authorised development as listed in Schedule 1 can be undertaken on land that has been temporarily occupied.
- 4.35.64.34.6 Paragraph (2) requires the Applicant to provide a notice 14 days before taking temporary possession of land. This 14 day period is proportionate and ensures that the Proposed Development can be delivered expeditiously, reducing impacts on local communities whilst balancing the need to provide appropriate notice to persons with interest in land.
- 4.35.74.34.7 Paragraph (3) is provided to ensure that the Applicant is not inhibited from taking temporary possession of land in circumstances where there is a danger to the authorised development, the public or the surrounding environment. This provision has been included in made temporary possession articles (see, for example, article 31(4) of The Southampton to London Pipeline Development Consent Order 2020 and article 33(3) of The Boston Alternative Energy Facility Order 2023).

service of notices and compensation. This power does not apply with respect to houses, gardens or any other buildings for the time being occupied. Under paragraph (6), all temporary works must be removed before the Applicant gives

up possession under this article and the land must be restored to the reasonable satisfaction of the owners. Provision is made for giving notice and compensation 4.36.24.35.2 (paragraphs (3), (4), (7), (8) and (9)). This article is required to enable the Applicant to carry out maintenance during the maintenance period and is appropriate as it would impose a lesser burden than permanently acquiring interests and rights in land to achieve the same purpose. 4.36.44.35.4 The maintenance period in paragraph 12 has been adapted from the model provision to apply to the period 5 years beginning with the date of final commissioning as opposed to the date on which the authorised development is opened for use as this is more appropriate for this type of development. It also alters the maintenance period landscaping and ecological works to bring it in line with the maintenance period approved under the landscape and ecological plan in the requirements under schedule 2 of the Order. Similar wording has been used in other made Orders for generating stations, including the Hirwaun Generating Station Order 2015 (article 27(11)), the Progress Power (Gas Fired Power Station) Order 2015 (article 28(11)), the Wrexham Gas Fired Generating Station Order 2017 (article 27(11)), the Riverside Energy Park Order 2020 (article 32(11)), The Gate Burton Energy Park Order 2024 (article 28(11)), The Mallard Pass Solar Farm Order 2024 (article 30(11)) and The Cottam Solar Project Order 2024 (article 30(11)). 4.374.36 Article 356 - Statutory undertakers This article provides the Applicant with statutory authority to 4.37.14.36.1 acquire interests and rights over land owned by statutory undertakers (i.e. utilities such as electricity and gas companies). It also allows the Applicant to extinguish rights or restrictions for the benefit of land that statutory undertakers have over the Order land, and to remove, relocate or reposition their apparatus. Additionally, this article provides the Applicant with the power to construct the Proposed Development so as to cross under or over statutory undertakers' apparatus and to construct any necessary track or roadway,

media under or over existing apparatus.

4.37.34.36.3

together with the right to maintain or remove the same, and to install service

and substantially similar to article 29 of Gate Burton Energy Park Order 2024, article 31 of The Mallard Pass Solar Farm Order 2024 and article 31 of The

The drafting is based on article 31 of the Model Provisions

Cottam Solar Project Order 2024) but the article also seeks at paragraphs (c) and (d), in common with other DCOs (see, for example, article 31(c) and (d) of the Thorpe Marsh Gas Replacement Pipeline Order 2016), the power to:

- a) construct the authorised development so as to cross under or over statutory undertakers' apparatus; and
- b) construct over existing apparatus belonging to statutory undertakers any necessary track or roadway, together with the right to maintain and/or remove the same, and install such service media under or over the existing apparatus needed in connection with the authorised development.
- 4.37.44.36.4 This power is sought to ensure that the Applicant is able to erect all necessary above ground installations, site compounds and storage areas in connection with the construction of the authorised development.
- 4.37.54.36.5 Diligent inquiries have been made to identify all relevant rights and statutory undertakers' apparatus. However, it is still possible that new rights or apparatus may be discovered during the course of the construction of the authorised development. On this basis, a general power for the extinguishment of rights and removal or relocation of apparatus belonging to statutory undertakers over or within the Order limits is required.
- 4.37.64.36.6 This article is subject to Schedule 12 which contains provisions for the protection of certain statutory undertakers to ensure their continued ability to carry out their functions despite the interference with their rights/apparatus required to facilitate the Proposed Development.

4.384.37 Article 367 – Apparatus and rights of statutory undertakers in closed streets

4.38.14.37.1 This article governs what happens to statutory utilities' apparatus (pipes, cables, etc.) under streets that are closed by the Order. This article is required because, without it, the statutory undertaker would not have access to the apparatus, since there would no longer be a right of way along the street. Similar wording has been used in other made Orders for generating stations, for example article 30 of The Gate Burton Energy Park Order 2024, article 32 of The Mallard Pass Solar Farm Order 2024 and article 32 of The Cottam Solar Project Order 2024.

4.394.38 Article 378 – Acquisition of wayleaves, easements and other rights

4.39.14.38.1 This article explains that Schedule 11 (Acquisition of wayleaves, easements and other rights) shall have effect.

4.404.39 Article 389 - Recovery of costs of new connections

4.40.14.39.1 This article (which reflects the Model Provisions) provides that if a gas, water, electricity or sewerage undertaker's or public communications provider's apparatus is removed thereby interrupting the service to owners or occupiers of premises, their costs incurred in obtaining a new service can be recovered from the undertaker. This has been used in other made Orders for generating stations, for example article 31 of The Gate Burton Energy Park Order 2024, article 33 of The Mallard Pass Solar Farm Order 2024 and article 33 of The Cottam Solar Project Order 2024.

4.41<u>4.40</u> Article <u>39</u>40 - Special Category Land

- 4.41.14.40.1 Under Section 132 of the 2008 Act an order granting development consent is subject to Special Parliamentary Procedure when it authorises compulsory acquisition of a right over land to which Section 132 applies. The exception is if the Secretary of State is satisfied that certain tests under Section 132(2) are met.
- 4.41.24.40.2 Under Section 132 of the 2008 Act, as amended by section 24 of the Growth and Infrastructure Act 2013, an order granting development consent shall not be subject to Special Parliamentary Procedure if the Secretary of State is satisfied that the special category land when burdened with the order rights will be no less advantageous to affected persons than it was before the imposition of the order rights.
- 4.41.34.40.3 Under the terms of the Order, land in the East Riding of Yorkshire identified in the book of reference [EN010157/APP/4.2] and on the special category land plans [EN010157/APP/2.5] and numbered 13-6,13-8,14-1 and 14-3 form part of a special category of land subject to protection under Section 132 of the 2008 Act. Further justification on this is provided within the Statement of Reasons [EN010157/APP/4.1], which explains that the Applicant considers the rights proposed to be acquired over the area of special category land identified are of limited impact, and as a result the Applicant considers that the Secretary of State can so certify that the order shall not be subject to Special Parliamentary Procedure.

4.41.44.40.4 This article is substantially the same as article 31 of The National Grid (Richborough Connection Project) Development Consent Order 2017, article 33 of The Southampton to London Pipeline Development Consent Order 2020 and article 41 of The National Grid (Bramford to Twinstead Reinforcement) Order 2024.

4.42 4.41 Article **4 0 1** Crown Rights

4.42.14.41.1 This article reflects the terms of section 135 of the 2008 Act and is also precedented in article 37 of the Awel y Môr Offshore Wind Farm Order 2023, article 45 of The Gate Burton Energy Park Order 2024 and article 48 of The Cottam Solar Project Order 2024.

Part 6 - Miscellaneous and General

4.434.42 Article 412 - Application of landlord and tenant law

4.43.14.42.1 This article governs the leasing of land by the Applicant to any other person. It allows the terms of the lease to override any statutory provisions relating to landlord and tenant law. This article is a Model Provision which is included in numerous made DCOs. For example, article 34 of The Gate Burton Energy Park Order 2024, article 36 of The Mallard Pass Solar Farm Order 2024 and article 36 of The Cottam Solar Project Order 2024).

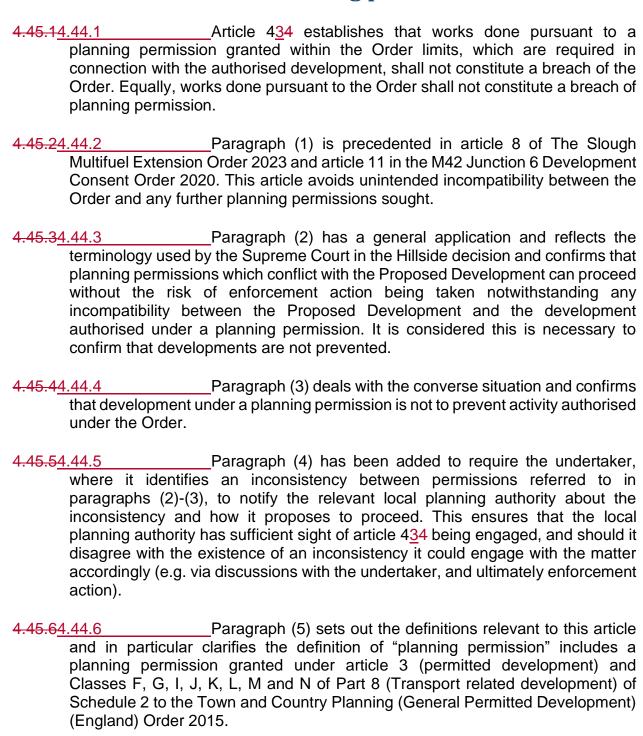

4.44<u>4.43</u> Article 4<u>2</u>3 – Operational land for purposes of the 1990 Act

4.44.14.43.1 This article is a Model Provision which is included in numerous made DCOs and has the effect of ensuring that the land on which the authorised development is constructed will be "operational land" under section 264(3)(a) of the 1990 Act. The effect is to ensure that planning rights attaching to the undertaker in relation to operational land have effect as they would do if planning permission had been granted for the authorised development.

4.44.24.43.2 This article is as found in in article 35 of the Longfield Solar Farm Order 2023, article 13 of The Little Crow Solar Park Order 2022, article 35 of The Gate Burton Energy Park Order 2024, article 37 of The Mallard Pass Solar Farm Order 2024 and article 37 of The Cottam Solar Project Order 2024.

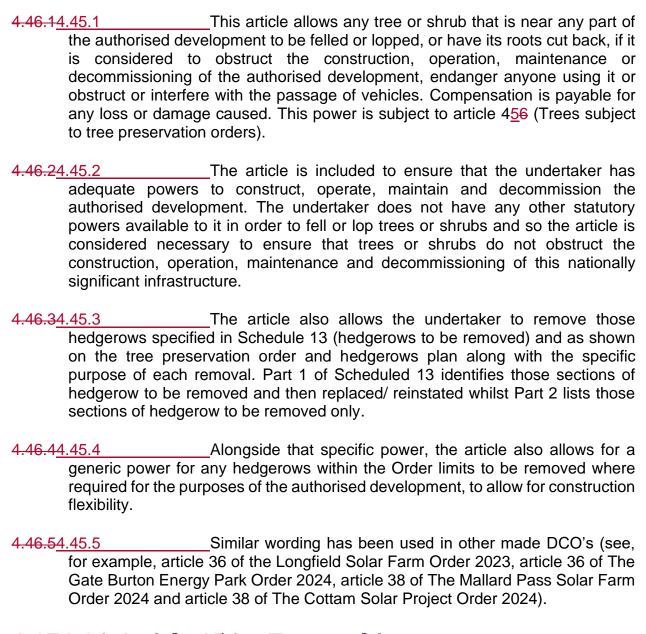

4.454.44 Article 434 - Planning permission

4.464.45 Article 445 - Felling or lopping of trees and removal of hedgerows

4.474.46 Article 4<u>5</u>6 - Trees subject to tree preservation orders

4.47.14.46.1 This article provides that the undertaker may fell or lop or cut back the roots of any tree which is subject to a to tree preservation order (TPO)

to prevent it obstructing or interfering with the construction, maintenance, or operation of the authorised development or from constituting a danger to persons using the authorised development. Compensation is provided if loss or damage is caused. The effect of the article is that the works it permits, if carried out to a tree protected by a TPO, are deemed to have consent, and its inclusion is therefore consistent with the purpose of DCOs being to wrap up all of the required consents for a project. The article is a model provision included in numerous made DCOs, substantially found in article 37 of the Longfield Solar Farm Order 2023.

4.484.47 Article 467 - Certification of documents, etc.

4.48.14.47.1 This article provides for various plans and other documents to be certified by the Secretary of State as true copies of those documents referred to in the Order. The documents in question (with their reference and revision numbers) are listed in Schedule 14. A form of this article is included in the Model Provisions and in the majority of DCOs made to date.

4.494.48 Article 478 - Service of notices

- 4.49.14.48.1 This article governs how any notices that may be served under the Order are deemed to have been served properly. In particular, it allows service by email with the consent of the recipient, and deals with the situation of service on an unknown landowner.
- 4.49.24.48.2 The provision is useful because it provides clarity on the issue. It is noted that the service of notice provisions under sections 229 and 230 of the 2008 Act apply to notices served under that Act rather than notices served under a DCO made under that Act. This article has precedent in a number of orders, for example, the Little Crow Solar Park Order 2002 (article 15), the Longfield Solar Farm Order 2023 (article 41), the Boston Alternative Energy Facility Order 2023 (article 48), The Gate Burton Energy Park Order 2024 (article 42), The Mallard Pass Solar Farm Order 2024 (article 42) and The Cottam Solar Project Order 2024 (article 44).

4.504.49 Article 489 - Arbitration

4.49.1 This article governs what happens when two parties disagree in the implementation of any provision of the Order. The parties must first use reasonable endeavours to settle any difference through negotiations undertaken in good faith but if this does not resolve matters, then the matter is to be settled by arbitration, and if the parties cannot agree on who the arbitrator should be, this

is decided by the <u>President of the Institution of Civil Engineers</u>. Secretary of State. Paragraph (4) of the Order ensures that decisions made by the Secretary of State is not subject to arbitration.

- 4.49.2 Paragraphs (1) and (3) have broad precedence in The Southampton to London Pipeline Development Consent Order 2020 and The Thurrock Flexible Generation Plant Development Consent Order 2022.
- 4.50.14.49.3 Paragraph (4) is precedented in Section 40(2) in The Gate
 Burton Energy Park Order 2024.

4.514.50 Article 4950 - Requirements, appeals, etc.

4.51.14.50.1 This article provides a formal process in relation to the requirements and means that the undertaker has a right of appeal to the Secretary of State if an application is made to discharge a requirement and that application is refused or not determined. This approach is precedented, see article 18 of the Little Crow Solar Park Order 2022 and article 43 of the Keadby 3 (Carbon Capture Equipped Gas Fired Generating Station) Order 2022.

4.524.51 Article 501 - Protective provisions

4.52.14.51.1 This article provides that Schedule 12 (protective provisions) has effect.

4.53<u>4.52</u> Article 5<u>1</u>2 - Funding

4.53.14.52.1 This article provides that the undertaker may not exercise a number of powers prior to it putting into place a guarantee or security equal to its potential liability to compensation payable under the Order which is approved by the Secretary of State. This article is as found in article 39 of the Cleve Hill Solar Park Order 2020, article 31 of the Awel y Môr Offshore Wind Farm Order 2023, article 43 of the Longfield Solar Farm Order 2023, article 44 of The Gate Burton Energy Park Order 2024, article 44 of The Mallard Pass Solar Farm Order 2024 and article 46 of The Cottam Solar Project Order 2024.

4.54 4.53 Article **523** - No double recovery

4.54.14.53.1 This article provides that compensation is not payable both under this Order and other compensation regimes for the same loss or damage.

In addition, the article provides that there is not to be double recovery under two or more different provisions of this Order.

- 4.54.24.53.2 The article follows the well-established principle of equivalence in compulsory purchase compensation, namely that a claimant is to be compensated for no more and no less than their loss.
- 4.54.34.53.3 This article has precedent in the National Grid (Richborough Connection Project) Development Consent Order 2017 (article 47), the North London Heat and Power Generating Station Order 2017 (article 35), the M25 Junction 28 Development Consent Order 2022 (article 49), the Sizewell C (Nuclear Generating Station) Order 2022 (article 46), the Boston Alternative Energy Facility Order 2023 (article 51) The Gate Burton Energy Park Order 2024 (article 39), and The Cottam Solar Project Order 2024 (article 41).

5 Schedules

- 5.1.1 **Schedule 1 (Authorised development)** specifies numbered works comprised in the authorised development (the NSIP) for which development consent is sought and other associated development works. The works should be read alongside the **Works Plans [EN010157/APP/2.2]**. The Schedule relates to article 3.
- 5.1.2 **Schedule 2 (Requirements)** contains draft requirements corresponding to conditions which, under section 120(2) of the Act, could have been imposed on the grant of planning permission for the authorised development had it not fallen within the regime of the Act. The requirements have a similar purpose to planning conditions.
- 5.1.3 Requirement 1: Interpretation This requirement defines the terms used in the remainder of the Schedule.
- 5.1.4 Requirement 2: Commencement of the Authorised Development This requirement is based upon the model provisions and places a limit of 5 years for commencement of the Authorised Development.
- 5.1.5 Requirement 3: Detailed design approval This requirement stipulates the details that must be submitted to and approved by the local planning authority before any part of the works can commence. The details submitted must be in accordance with design parameters document unless a variation to the design parameters document has been demonstrated to the satisfaction of the local planning to not give rise to any materially new or materially different environmental effects in comparison with those reported in the Environmental

- Statement. The authorised development must be carried out in accordance with the approved details.
- 5.1.6 Requirement 4: Construction environmental management plan (CEMP) Under this requirement, no part of the authorised development may commence until the undertaker has <u>carried out consultation with the Environment Agency and</u> submitted <u>the CEMP</u> to the local planning authority and received approval for a CEMP for that part, which are substantially in accordance with the Outline CEMP. The construction of the authorised development must be in accordance with the CEMPs as approved.
- 5.1.7 Requirement 5: Construction traffic management plan (CTMP) Under this requirement, no part of the authorised development may commence until the undertaker has, following consultation with Hull City Council and National Highways, submitted to the local planning authority and received approval for a CTMP for that part which is in substantial accordance with the outline CTMP.
- 5.1.8 Requirement 6: Soil Management Under this requirement no part of the authorised development may commence until a soil management plan, substantially similar to the outline soil management plan. for that part has been submitted to and approved by the local planning authority. The construction of any phase of the authorised development must be carried out in accordance with the approved soil management plan for that part.
- 5.1.9 Requirement 7: Site Waste under this requirement no part of the authorised development may commence until a site waste management plan, substantially similar to the outline site waste management plan, for that part has been submitted to and approved by the local planning authority.
- 5.1.10 Requirement 8: Battery safety management plan (BSMP) Under this requirement, prior to the commencement of any part of the authorised development which includes Work No.2 a BSMP for that part must be submitted to the local planning authority following consultation by the undertaker with the Humberside Fire and Rescue service and the Environment Agency. Any BSMP must be in substantial accordance with the outline BSMP.
- 5.1.11 Requirement 9: Landscape and ecological management plan (LEMP) Under this requirement, no part of the authorised development may be commenced until the undertaker has, following consultation with the Environment Agency, Natural England and Historic England, submitted to the local planning authority and received approval for a written LEMP for that part which is in substantial accordance with the outline LEMP. Any LEMP must be implemented as approved and maintained throughout the operation of the relevant part of the authorised development to which the LEMP relates.

- 5.1.12 Requirement 10: Public rights of way— No part of the authorised development may be commenced until a rights of way and access management plan for any part of the authorised development that requires public footpath to be temporarily closed or restricted within that part, has been submitted to and approved by the local planning authority. The plan must be substantially in accordance with the outline rights of way and access management plan. The rights of way and access management plan must be implemented as approved.
- 5.1.13 Requirement 11: Fencing and other means of enclosure The undertaker is required to obtain the written approval from the local planning authority for any proposed permanent and temporary fences, walls, or other means of enclosure, for each part prior to commencement of the part in question of the authorised development. Any construction site must remain securely fenced in accordance with the approved details at all times during construction of the authorised development. Any temporary fencing must be removed on completion of the part of construction of the authorised development for which it was used. In the event that temporary fences, walls or other means of enclosure are required for the permitted preliminary works, no permitted preliminary works may take place until written details of all proposed temporary fences, walls or other means of enclosure required for such works have been submitted to and approved by the local planning authority. Any approved permanent fencing must be completed the date of final commissioning of the authorised development.
- 5.1.14 Requirement 12: Operational noise No part of Works Nos. 1 or 2 may commence until an operational noise assessment containing details of how the design of that numbered work has incorporated mitigation measures to ensure the operational noise rating levels as set out in the environmental statement are to be complied with for that part has been submitted to and approved by the local planning authority. The approved mitigation measures must be implemented as approved.
- 5.1.15 Requirement 13: Archaeology This requirement stipulates that no part of the authorised development may commence until a written scheme of investigation of areas of archaeological interest within that part has been submitted to and approved by the local planning authority. Any archaeological works or programme of archaeological investigation must be carried out in accordance with the approved scheme. Any written scheme of investigation submitted for approval must be substantially in accordance with the archaeological management strategy
- 5.1.16 Requirement 14: Operational environmental management plan (OEMP) Prior to the date of final commissioning, an OEMP must be approved by the local planning authority. The OEMP must be substantially in accordance with the outline OEMP. The operation of the authorised development must be carried out in accordance with the approved OEMP.

- 5.1.17 Requirement 15: Decommissioning and restoration This requirement provides that within 3 months of the date that the undertaker decides to decommission any part of the solar farm works and grid connection works, the undertaker must submit to the local planning authority for its approval a decommissioning plan for that part which substantially accords with the outline decommissioning environmental management plan. Decommissioning will commence no later than 40 years following the date of final commissioning of the authorised development.
- 5.1.18 Requirement 16: Requirement for written approval This requirement provides that where any approval, agreement or confirmation of the local planning authority or another person is required under these requirements, then such approval, agreement or confirmation must be provided in writing.
- 5.1.19 Requirement 17: Amendments to approved details This requirement allows details which have been submitted and approved by the local planning authority to be amended/varied in writing by the local planning authority. The amendment or variation must always be in accordance with the principles and assessment undertaken in the ES and must not give rise to any materially new or different environmental effects from those assessed in the original ES.
- 5.1.20 Requirement 18: Anticipatory steps towards compliance with any requirements provides that any steps taken before the Order comes into force that were intended to be steps towards compliance with any provision of Schedule 2 may be taken into account for determining compliance with that provision as if they had been taken after the Order came into force. The Applicant's intention is to be able to consult local authorities on draft control documents prior to the Order being made. The Applicant wishes to commence construction of the Proposed Development as soon as practicable once the Order is made (should it be) and therefore this Requirement would facilitate the Applicant getting on site as soon as possible subject to all other requirements in the Order being met. This has precedence in The Southampton to London Pipeline Development Consent Order 2020 (schedule 2, requirement 21), The Thurrock Flexible Generation Plant Development Consent Order 2022 (schedule 2, requirement 23) and The M25 Junction 28 Development Consent Order 2022 (schedule 2, requirement 23).
- 5.1.21 Requirement 19: Consultation Under this requirement, where the Applicant is required by Schedule 2 to consult with another party prior to discharging a requirement, the undertaker must provide such other party with not less than 21 business days for any response to consultation. Any details submitted to the planning authority for approval must be accompanied by a summary report setting out the consultation responses and any responses to them.

- 5.1.22 Part 2 of Schedule 2 (Procedure for discharge of requirements) applies to any consent, agreement or refusal which needs to be obtained under the Requirements set out in Part 1 of Schedule 2 or under any other provision of the Order. It clarifies the procedure which applies in respect of these additional consents. This Schedule relates to article 3.
- 5.1.23 **Schedule 3 (Legislation to be disapplied)** a list of the local legislation that the Order will disapply insofar as the provisions (in that local legislation) still in force are inconsistent with the powers contained in the Order, pursuant to article <u>910</u>.
- 5.1.24 **Schedule 4 (Alteration of streets)** This Schedule lists the streets which will be altered pursuant to the power contained in article 134 (power to alter layout, etc. of streets).
- 5.1.25 **Schedule 5 (Streets and public rights of way to be temporarily closed or restricted)** This Schedule sets out the streets (part 1) and public rights of ways (part 2) which are subject to temporary closure, alteration, diversion or restriction under article 1<u>5</u>6.
- 5.1.26 **Schedule 6 (Access to works)** This Schedule sets out where new permanent accesses to works will be formed and laid out under article 167.
- 5.1.27 **Schedule 7 (Traffic Regulation Measures)** This Schedule contains details of the streets that are subject to temporary traffic regulation measures pursuant to article 189 and contains the details of the nature of the measures for each affected street. Part 1 sets out the traffic signal and banksperson control areas. Part 2 sets out temporary speed limits.
- 5.1.28 Schedule 8 (Land in which only new rights etc. may be acquired) This Schedule sets out the areas of land over which only new rights may be acquired or restrictive covenants imposed by the undertaker and the nature of the rights or restrictions. The plot numbers in column 1 of that table correlate to the land plans [EN010157/APP/2.4], column (2) explains the purposes for which rights over land may be acquired or the restrictive covenants imposed. The Schedule relates to article 256 (Compulsory acquisition of rights and imposition of restrictive covenants).
- 5.1.29 Schedule 9 (Modification of compensation and compulsory purchase enactments for the creation of new rights and imposition of new restrictive covenants) This Schedule modifies existing compensation legislation including the Land Compensation Act 1973 and the Compulsory Purchase Act 1965. This has been updated to reflect any necessary changes arising as a result of the

- Housing and Planning Act 2016. The Schedule relates to article 256 (Compulsory acquisition of rights).
- 5.1.30 **Schedule 10 (Land of which temporary possession may be taken)** This Schedule sets out the land referred to in article 334 which the Applicant may temporarily occupy and the purpose for which that temporary occupation may be taken.
- 5.1.31 Schedule 11 (Acquisitions of wayleaves, easements and other rights) This Schedule makes provision for the undertaker to act on behalf of statutory undertakers in acquiring wayleaves, easements or other rights for the diversion or relocation of electricity, gas, water, sewerage or telecommunication apparatus. It relates to article 378 (Acquisition of wayleaves, easements and other rights).
- 5.1.32 The drafting itself draws upon the drafting of equivalent powers which benefit electricity, gas, water, sewerage and telecoms undertakers under the Electricity Act 1989, the Gas Act 1986, the Water Industry Act 1991 and the Communications Act 2003. These existing statutory powers have been adapted only insofar as necessary to enable the undertaker to act on behalf of such statutory undertakers in seeking wayleaves through a compulsory process should they be needed in future. Save for the fact that all consideration or compensation due to land owners is required to be payable by the undertaker (rather than the relevant statutory undertaker), the processes involved are otherwise unchanged. and continue to reflect the statutory requirements and safeguards on the use of such powers. Experience has shown that statutory undertakers can be reluctant to exercise their own powers to acquire easements or wayleaves even where this would facilitate the undertaker's delivery of a project, due to the time, expense and compensation involved. The proposed article 38 and schedule 11 would provide an option which may be useful in some circumstances to both the undertaker and the relevant statutory undertaker, and may only be exercised where the relevant statutory undertaker gives their consent to the undertaker. It would facilitate the timely and efficient implementation of the authorised development, and the diversion or relocation of utilities where required, both of which are in the public interest.
- 5.1.31 This drafting is precedented in Article 44 and Schedule 18 of The Sizewell C (Nuclear Generating Station) Order 2022.
- 5.1.325.1.34 Schedule 12 (Protective provisions) sets out the provisions for the protection of statutory undertakers affected by the authorised development, as referred to in article 501. Part 1 provides protection for the electricity, gas, water and sewerage undertakers. Part 2 provides protection for operators of electronic communications code networks. Part 3 provides

protection for the drainage authorities. Part 4 provides protection for the Environment Agency.

- 5.1.335.1.35 Schedule 13 (Hedgerows to be removed) lists the hedgerows that the Applicant is allowed to remove along with the specific purpose of each removal, pursuant to article 445. Part 1 identifies those sections of hedgerow to be removed and then replaced/ reinstated whilst Part 2 lists those sections of hedgerow to be removed only. The Applicant has set out the purpose for specific tree removals and their impacts in the Arboricultural Impact Assessment [EN010157/APP/6.4] at Table 2: Tree removals and impacts.
- 5.1.345.1.36 Schedule 14 (Documents to be certified) lists the documents and plans to be submitted with the application and to be certified by the Secretary of State. The list is subject to change. This Schedule relates to article 467 (Certification of documents, etc.).
