Hi

I writing to object to the pear tree solar farm.

Our property is going to be bang right in the middle of section B.

Surround us with glass which ever way we look.

We have been told we will several battery solstorage units close to our property with fans running 24/7.

Constant humming from these will mess with out health.

We feel very vulnerable that if there is a fire that brakes out we will be at a very very high risk of breathing in dangerous chemicals from these.

Our rural property is on it own with other properties been a mile away and no traffic.

If this gets the go ahead we are going to be living in the middle of an industrial site, and will totally spoil our rural nature of the area.

We have Barn owls, Bats, King Fishers and plenty of other nesting birds that enjoy the peace and quiet no one to disturb them this will ruin the local wild life.

Especially the barn owl which will be 10 metres from the solar panels and construction site.

All our hard work we have put into making the house/farm a lovely place to live all these years will be just ruined.

So please consider us that are going to be so badly affected by this monstrous solar farm.

Kind regards

P A Peel.
