

1. The National Grid is already many times over-subscribed with offers of solar generated electricity. No more offers are necessary.
2. This is an opportunistic developer-generated scheme. There is no strategic rationale for siting a solar farm on this site.
3. Road access to the site is inaccessible for the heavy haulage that will be required. The impact on all surrounding roads for many miles will be devastating.
4. North Bucks continues to suffer from the combination of multiple infrastructure projects including HS2 and East-West Rail.
