

I was unable to attend the meetings at Horwood House on 24 and 25 February 2026 because of work and family commitments. I would have been there if I could as I am very opposed the Rosefield Solar Factory.

If allowed to go ahead there would be very significant loss of beautiful countryside and huge adverse effects on those of us who live here human and otherwise.

I am particularly concerned about the travel chaos which will be caused in the construction stage and the ongoing safety of the BESS, particularly in relation to fire which I understand to be a significant risk.
