

I am registering my total opposition to the planned Rosefield solar development and BESS storage in the Claydons and Granborough

The impact on local infrastructure will be immense with increased HGV and other traffic on small village roads and much noise and traffic pollution

There will be a total loss of rurality ruining relatively unspoilt countryside with impact on wild life and endangered species
The ancient woodland will be threatened e.g. Runt's wood which is a continuation of ancient Bernwood forest which has existed since at least Tudor times. This area is invaluable for recreation such as walking, riding etc

There is a considerable fire risk from battery storage proposed

Huge cumulative impact from HS2, EW rail and nearby "mega prison" at Edgcott nearby
