

I keep my horse in middle claydon and I believe this solar farm is once again going to bring huge amounts of traffic and disruption to the area. It is unsafe to ride on the roads now but more lorry movements again after east west rail and HS2 is dangerous in this rural community.

At the very least the land owners should provide extra off road routes especially as I believe they will use the only existing bridleway as the main access for construction traffic. There WILL be an accident if safe alternatives away from the traffic are not provided. Please ensure that they do provide alternative permissive routes if this awful solar farm goes ahead.

Thank you
