

Rosefield Solar project.

I live locally at Hogshaw and the impact of another major project in our local vicinity is very concerning to me.

Our local infrastructure is pay a high price for all this building work . The roads have not been repaired from the traffic damage caused by HS2. CWR and Incinerator projects ect ect and yet another major project is planned without taking into account the impact to our local communities let alone the continued degradation to the local Eco system and the day to day life of local residents
