

I'm concerned about the increased traffic this will bring to the village which is on top of the already increased HS2, EWR and Prison traffic, most of which are very inconsiderate drivers with no respect for speed limits. The road closures which will make traveling anywhere difficult, and cause delays. I am not happy about the risk of the batteries. This will destroy the country side and have a huge impact on the local farming community and their livelihood as well as food supply.
