

I object to the Rosefield Solar Farm project because perfectly good agricultural land is being used where a brown field site would be much better use of land.

We have endured the ongoing construction traffic of HS2 and EWR causing dangerous potholes and even more dangerous drops off the tarmac road into deep gulleys caused by heavy construction traffic which has resulted in burst tyres, broken wheels and cars having their steering and suspension ripped out.

The proposed project will be a further eyesore in addition to HS2 and EWR and impact upon local residents enjoyment of this part of N Bucks.
