

It should be noted that in any addition to any of the representations made about the impact of additional traffic on St Mary's Road that attendance at the local Church of England School will be severely impeded. Because there is no bus service and most students are brought to and from school by car from distances as far as Bicester, Aylesbury and all surrounding villages.

In addition there are many Grade 11 listed properties along the main road through East and Botolph Claydon. None of these properties have any foundations so the impact that increased traffic for long periods should be taken into account.
