

Due to HS2, for years we have had to put up with road closures causing a daily inconvenience. This is expected to be the case for many years to come.

As a result of the road closures, local roads have fallen in to a terrible state of disrepair due to the extra traffic volume caused by the diversion via inappropriate routes.

This has been exacerbated by the works for East West Rail causing similar issues.

On top of that we have the development of the prison at Edgcott being expanded.

The addition of works traffic for the proposed solar farm will make dire situation even worse.

Our local pub, shop and coffee shop have all seen a drop in trade due to the ongoing works.

We are currently able to enjoy the beautiful footpaths and bridleways that are going to be irreparably damaged by the solar farm project.

The much used footpaths on Quainton Hill now look out to the South on the scarred landscape from HS2, and now the view to the West will be ruined by the creation of the solar farm.

Viable agricultural land should not have solar farms installed until all available roofspace on homes, shops, warehouses, factories and the like have solar panels installed.
