

Firstly i would like to raise that my original comments from the planning application have not be responded to. EN010158 Rosefield Solar Farm library definitive record of the valid Relevant Representations received by the Planning Inspectorate between 5 November 2025 to 12 December 2025 does not include my name. Therefore I have no RR number and response from Rosefield in their 597 page Applicant response to relevant representations. Despite the response statements to mitigate effects on roads, access, and rural businesses, the response is inadequate and does not assess full extent of the severe effects on our already poor roads and effects on reducing tourism to local attractions, such as Hogshaw Wildlife Park, directly off the main A41 corridor access. I feel the documents supplied for these above are inadequate and not realistic of the roads of access and disruption it will cause not only for the first year but longer term.

██████████ I believe if this goes ahead it will mean young peoples opportunities for work and mental health will be decreased.
