

We currently enjoy walking our dogs in the fields where Solar panels will be built and devastate the countryside - it will be so out of character with the current quiet, beautiful countryside. It will also hugely affect all the wildlife in a negative way. The surrounding roads are not suitable for this huge construction project. The cumulative effect of HS2, East West Rail, the prison, the new substation, Statera BESS and other BESS and solar applications in our small villages will only cause even more misery on our roads. The BESS is hugely dangerous, unregulated and an accident waiting to happen on a huge scale. The noise during construction and after will be completely out of keeping with the beautiful rural peace we currently have.
