I wrote this 3 years ago and still feel the same...disappointed and disgusted that it's still being considered.

Argument against t...

I have to say how distressed and indeed disgusted I am about this proposed project

What is the sense in using farmland to make electricity, so making us more dependent on the possibility of importing our food? I am also amazed at the term 'farm' when it doesn't produce food, but instead devastates even more of the natural environment, so putting wildlife at risk, as our experience with HS2 EW rail has proved.

At the end of the day it seems to me it's more about commercial and financial gain for the government rather than considering the people who will have to live with this, yet another huge project on our landscape.
