

Following my previous submission regarding the Applicant not having done due diligence during the research period regarding visits to affected residents in the area of Rosefield Solar farm development; I would like to express my concern that again the Applicant has suggested limited sites for the inspectorate to visit during the post April 22nd deadline site visits .

I would specifically like to invite the inspectorate to visit my house and view the impact of the proposed solar farm location. I can explain easily during he visit how this development is already affecting my wife and I well being. .

If possible please visit during peak commuter hours 08:00-09:00 or 16:00 - 18:00 and it will also give the inspectorate opportunity to witness the horrendous traffic conditions in the is quite village of Botolph Claydon caused by HS2 developers traffic. Remember this will be significantly compounded by any development traffic movements from the proposed Rosefield Solar farm construction .
