

I live at [REDACTED] and my surroundings will be affected in many ways:

Views and noise from my house.

Traffic surrounding my house with noise, and light both from the road and the fields behind me.

Living with the horses

My house backs onto fields where the horses graze and any noise/light will have an adverse effect on both them and myself.

Please do make an effort to come and see the effects this will have on me and my property and all the properties that will be affected all along my road.
