

Would like to request a visit to be included in the itinerary to the driveway to [REDACTED]. The fields on either side of this driveway are designated for possible cable installation and construction compounds. As owners of [REDACTED], which is Grade 2 listed, we are concerned about access for heavy vehicles to these sites. The driveway is very fragile and heavy vehicles (ie tractors) are prohibited from using it, so any access must be from [REDACTED]. If disturbance of drive is likely, 24 hour access to [REDACTED] essential for health professionals. [REDACTED]. If drive way surface is damaged during cable installation, it must be reinstated immediately. Also concerned about excessive noise, pollution and upheaval generated by each of these two impositions.
